

Main San Gabriel Basin WATERMASTER

2025–2026
ANNUAL REPORT

IMPROVING THE WATER SUPPLY, DEVELOPING NEW WATER SOURCES, AND PROTECTING AND IMPROVING WATER QUALITY

Main San Gabriel Basin Watermaster is the agency charged with administering adjudicated water rights and managing groundwater resources within the watershed and groundwater basin known as the Main San Gabriel Basin.

4.8 MILLION ACRE-FEET OF WATER ADDED TO THE BASIN SINCE 1973

Whether because of drought-and-flood cycles, changing political and regulatory challenges, or the appearance of mussels, there is a never-ending need to develop new water supplies.

Watermaster does just that, pursuing every practical and cost-effective opportunity to increase Basin supplies—capturing stormwater, promoting conservation, expanding Cyclic Storage, supporting in-lieu deliveries, and purchasing supplemental water.

A FOUNDATION THAT HELD UNDER PRESSURE

The September 2025 discovery of golden mussels in Silverwood Lake was unwelcome but not unexpected. More surprising was how long imported supplies were cut off in response.

That cutoff, compounded by new testing requirements and the May 2026 discovery of quagga mussels at the San Gabriel Canyon Spreading Grounds, became an unplanned stress test of the water management programs and water supply reserves we have built over many years. I am proud to report it worked exactly as designed: Regional partners collaborated to address the mussels, RDA funds absorbed the unexpected mussel management and testing costs, proactive mitigation planning enabled a rapid response, and every Producer met its obligations without restrictions despite the lost deliveries.

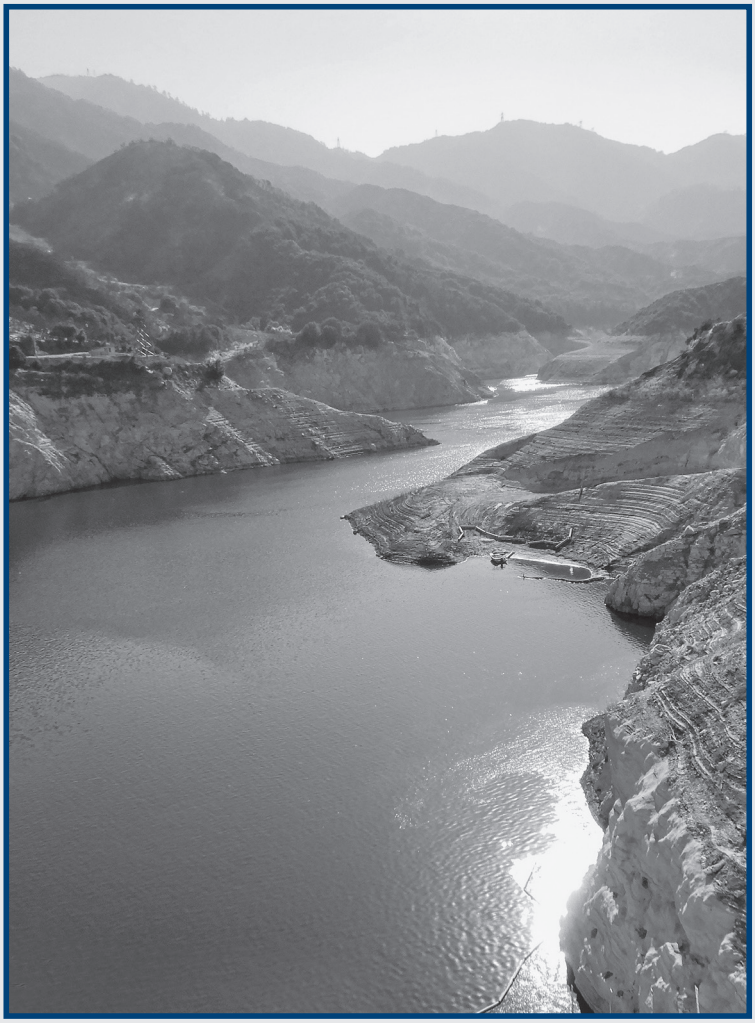

Most impressively, we have increased groundwater levels to 260+ feet, levels not seen since 1998.

This success reflects the value of Watermaster's long-standing partnerships and tools such as Letter Purchase Agreements and Cyclic Storage. It also underscores why sustained cooperation matters. More challenges lie ahead, including expected dry years and rising import costs, long-term mussel management costs, and new obligations from emerging contaminants and shifting regulations.

The Basin remained stable this year because of the foundation we have built together. We remain focused on adapting and supporting sustainable local supplies, including stormwater capture and, most importantly, Pure Water Southern California.

Only by working together can we manage the Basin sustainably, and I am confident we will continue our tradition of proactive, united action.

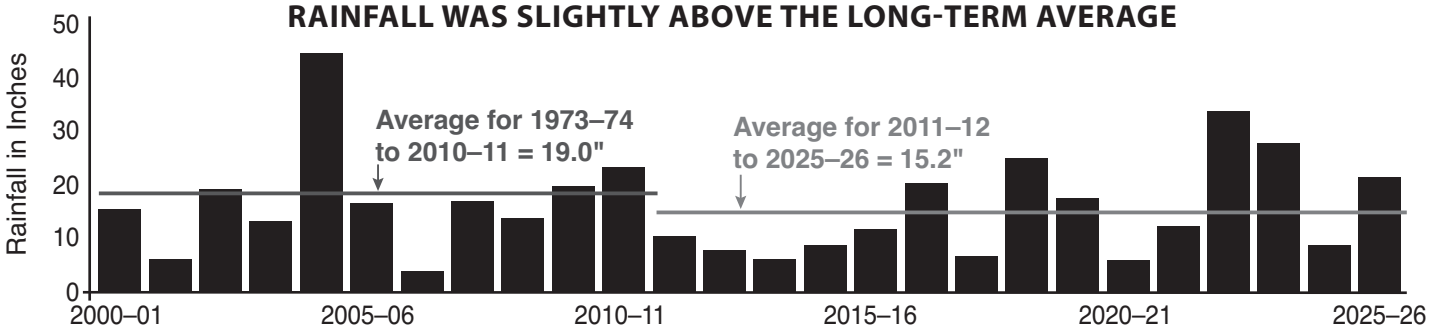

Kelly Gardner,
Executive Officer

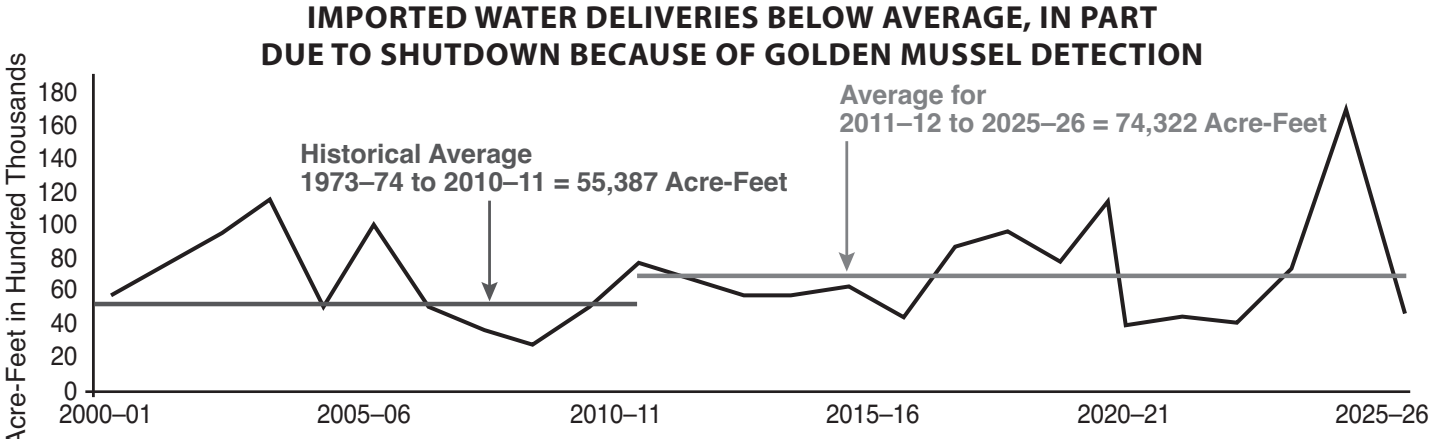

San Gabriel Canyon Reservoir.

Basin Healthy Despite Extreme Challenges

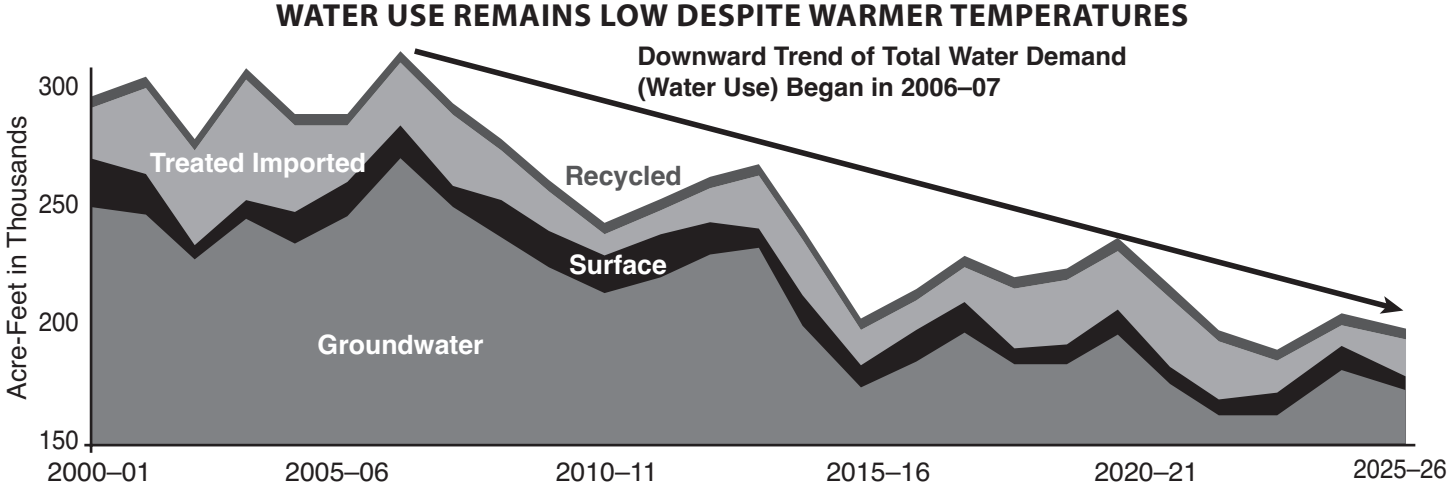

The Main San Gabriel Basin faces increasing hydrological extremes. For example, dry years with less than 10 inches of rain have quadrupled over the past 25 years, and rising temperatures are reducing how much water even wet years deliver to groundwater replenishment. Despite these swings and this year's mussel-related halt to imported supplies, Watermaster's proactive, adaptive management helped the Basin reach its highest groundwater levels since 1998.

Rainfall in the San Gabriel Valley has fluctuated dramatically over the last 25 years. Although long-term averages are about 18" a year, total rainfall has varied from 45" (in 2004–05) to less than 8" (in 2006–07, 2013–14, and 2020–21). Rainfall during the 2025–26 water year was 18"—about average, but a dramatic shift from the previous very dry year.

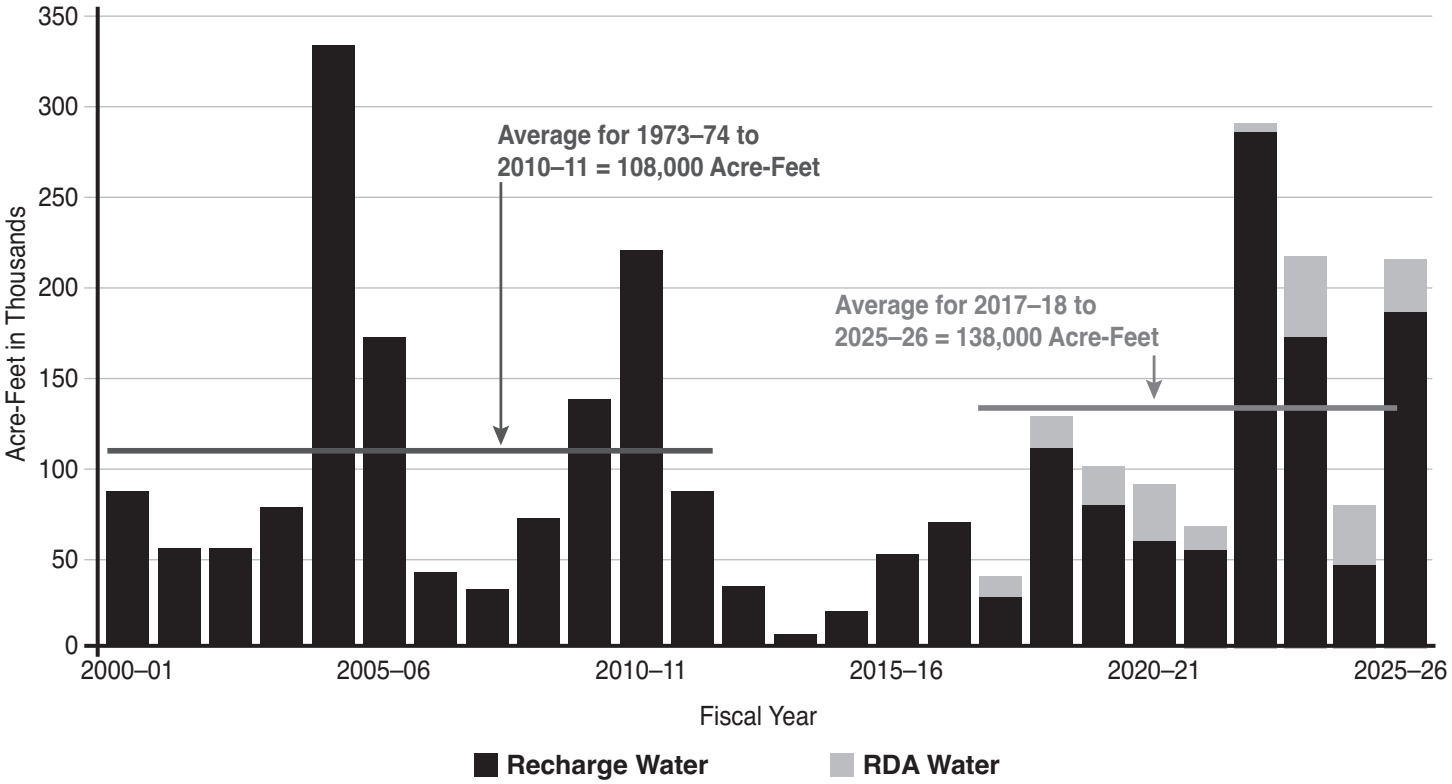

Golden mussel detections in Silverwood Lake halted untreated imported water deliveries after just three months. Only about 45,600 acre-feet of untreated water reached the Basin for replenishment before deliveries stopped in September 2025 of the fiscal year. Even so, total imported water for the year (treated and untreated combined) reached 61,740 acre-feet, close to the long-term average of 60,700 acre-feet.

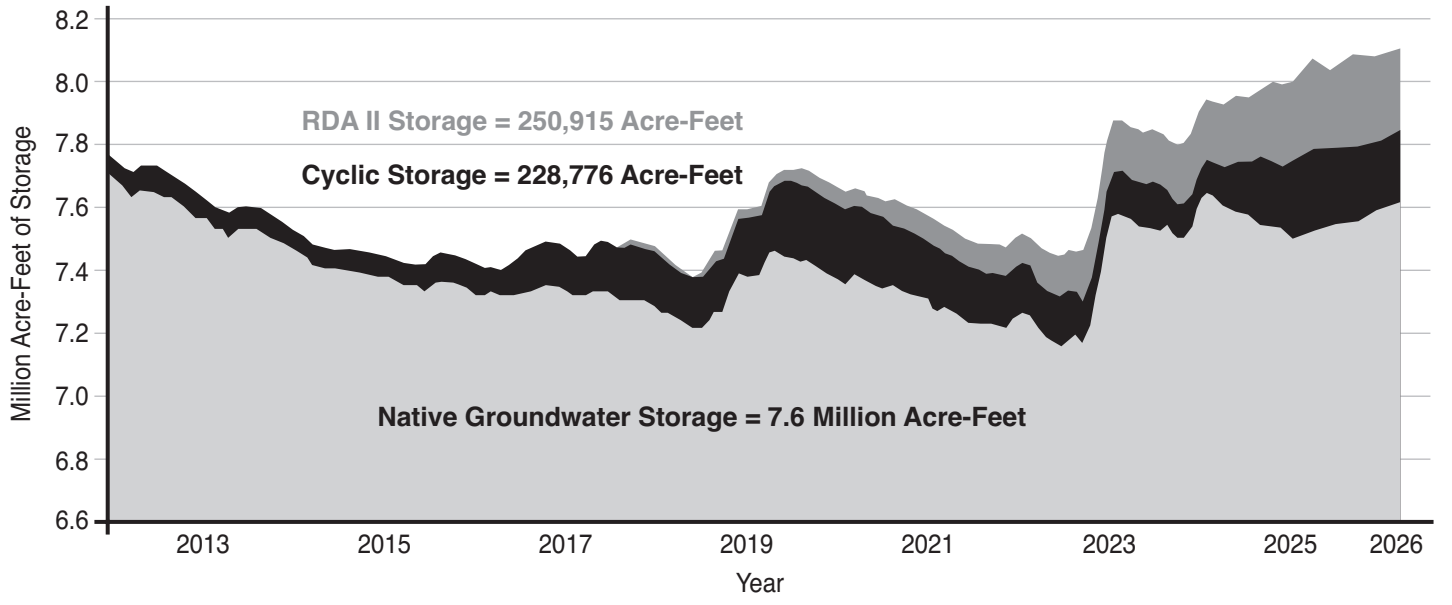

Water demand remains low at 199,995 acre-feet in 2025–26, a 5% decrease from the demand in 2024–25 and below the 10-year average.

RDA WATER BOOSTED GROUNDWATER STORAGE, WHILE A WET YEAR INCREASED RECHARGE

This year, 26,000 acre-feet of RDA II water was added to the Basin, down by about 4,000 acre-feet compared to last year. Local runoff water conserved for recharge was 189,000 acre-feet, a significant increase from last year due to heavier-than-average rainfall.

2025 RDA AND CYCLIC WATER KEEP BASIN STORAGE HIGH

Another 26,118 acre-feet of RDA II was added this year, supplementing the approximately 30,000 acre-feet added last year, bringing the RDA II storage water to 250,915 acre-feet. Total Cyclic Storage this year was 228,776 acre-feet.

Invasive Mussels Impact Basin Water

MUSSELS ARRIVE IN UPPER AREA AND SPREADING GROUNDS, BRINGING ONGOING BASIN MANAGEMENT CHALLENGES

Golden mussels detected in Upper Basin supply. On September 24, 2025, Los Angeles County Department of Public Works (DPW) halted imported water deliveries due to the presence of golden mussel veligers in Silverwood Lake, an upstream State Water Project reservoir in San Bernardino County. This is the first reported California suspension of State Water Project deliveries tied to a golden mussel detection. DPW temporarily halted imported water deliveries into the County's flood control system, including San Gabriel Valley groundwater recharge facilities, to contain the spread.

Quagga mussels detected at San Gabriel Canyon Spreading Grounds. In May 2026, DPW notified Watermaster of a quagga mussel detection along the shoreline and outlet pipe of Basin 1 at the San Gabriel Canyon Spreading Grounds. As a result, Watermaster modified its golden mussel Prevention, Control, and Mitigation Plan to incorporate more broad-scale infestations of invasive mussels, not specific to the golden mussel, and is working in partnership with DPW to implement the mitigation plan. The source remains under investigation.

WATERMASTER RESPONDS AND WORKS TO RESTORE FLOWS

Detection of quagga and golden mussels has long-term implications for regional water management and requires a coordinated response. Watermaster has proactively worked with regional partners to develop a mitigation plan since the first golden mussel detection in the State, in 2024.

Early action enabled a rapid response. When golden mussels were first detected in the State Water Project system in October 2024, Watermaster worked with Basin partners to begin developing a Mussel Control Plan, well before that work was required by law. Since then, Watermaster has met regularly with regional collaborators, including the Responsible Agencies, Producers, the California Department of Fish and Wildlife, the Metropolitan Water District, and DPW.

Mitigation carries substantial costs, shared by Basin partners. Costs for managing the golden mussel infestation are difficult to pin down, but agencies throughout the State have reported projected expenses in the range of $500,000 in FY 2026–27 to $1million by 2034–35, depending upon the type of facilities and variable impacts like flow rates.

Watermaster is updating the Court and working with local agencies. Watermaster met with the presiding judge, the Honorable Maureen Duffy-Lewis, in December 2025 and April 2026 to provide updates; a third meeting is scheduled for the fall. The Executive Officer and Board also continue to meet regularly with regional partners, including the County, to prevent further spread and ensure reliable imported water deliveries.

LEGISLATURE ACTS TO PROTECT IMPACTED WATER AGENCIES

AB 149 signed. On September 17, 2025, the governor signed AB 149, requiring the California Department of Fish and Wildlife to prevent, control, and eradicate mussel infestations in water supply systems and protecting agencies with approved control plans from related regulatory enforcement.

AB 1894 passed out of both houses unanimously. The legislature passed AB 1894 and sent it to the governor, which would bar a public agency from blocking imported water deliveries for groundwater replenishment over invasive mussels if the delivery complies with an approved control plan, absent documented health and safety risk. The bill responds to LA County's 2025 pause on State Water Project deliveries into San Gabriel Valley recharge facilities. It was subsequently vetoed by the governor in September.

HOW AND WHY MUSSELS ARE A MENACE TO WATER SUPPLIES

Golden mussels and quagga mussels pose similar threats. Golden mussels, first detected in North America in October 2024, spawn thousands of larvae several times a year and thrive across a wide range of temperatures and salinity. Quagga mussels are larger, longer-lived, lay hundreds of thousands of eggs annually, and are able to survive over a week out of water. Both species spread rapidly via boats and other surfaces, outcompete native wildlife, fuel algae blooms, and clog pipes and infrastructure.

> ***Watermaster believes strongly in the need for collective action to confront this challenge and is committed to a robust, effective control plan to protect the Basin and our shared water supply.***

Golden and quagga mussels are tiny mollusks that thrive with few natural predators outside their native ranges in Asia and Eastern Europe, respectively. Both have spread aggressively—golden mussels through Asia, South America, and now North America; quagga mussels through Europe and the Great Lakes region. Potential controls include copper-based treatments, applied within drinking water standards, and the introduction of predator species.

Tested by Crisis, Proven by Results

This year tested Watermaster's water management strategies: a complete halt to imported deliveries after golden mussel detections compounded the challenges the Basin already faces due to long-term drought and rising temperatures. Despite these pressures, the Key Well reached an elevation of 260 feet, the highest level since 1998—proof that the tools built over decades work when they are needed most.

RDA RENEWED FOR ANOTHER DECADE, WITH WORK UNDERWAY TO MEET FUTURE FUNDING NEEDS

Through the RDA, Watermaster has built a funding structure that makes it possible to purchase water before it is needed and ensures ready funding for unexpected challenges.

Since 2014, the RDA has become one of Watermaster's most important tools for managing the Basin, helping fund the storage of over 250,000 acre-feet of water for the benefit of all parties. Its value was proven again this year, when RDA reserves helped Responsible Agencies meet their obligations after golden mussel detections halted all imported water deliveries in FY 2025–26.

With the original 10-year assessment schedule expiring this year, an ad hoc committee reviewed the RDA's 10-year performance against rising costs, new fees, and new invasive mussel mitigation obligations and found that, at the current rate, RDA funds would be exhausted by 2033. Based on the committee's recommendation, the Board renewed the RDA in May 2026, holding the rate at $175/acre-foot for the next two years while continuing to evaluate funding needs going forward. Over the fiscal year, the committee will work with Producers and other stakeholders to determine the future funding levels needed to keep the RDA sustainable and build support for the potential increases expected to be identified.

LETTER AGREEMENTS ARE AN IMPORTANT SOURCE OF REPLENISHMENT WATER

Since 2017, Watermaster has partnered with the Upper San Gabriel Valley Municipal Water District (Upper Water), the Three Valleys Municipal Water District (TVMWD), and MWD through a series of letter agreements to pre-deliver untreated imported water for Basin management programs that allow for payment over time to maximize opportunities. Through these agreements, MWD has delivered a cumulative total of 405,517 acre-feet of imported water to date, with deliveries varying by hydrological conditions and local stormwater capture. Watermaster and Upper Water entered into their fourth agreement in fiscal year 2023–24, pre-delivering about 86,500 acre-feet during calendar year 2024. Watermaster and TVMWD entered a separate agreement the same year for about 35,000 acre-feet, and in fiscal year 2024–25, Watermaster and Upper Water entered a fifth agreement to pre-deliver an additional 85,600 acre-feet during calendar year 2025 that was not fully delivered due to the mussel-related shutdown.

CYCLIC STORAGE IS THREE TIMES THE LONG-TERM AVERAGE JUST WHEN THE BASIN NEEDED IT

The Cyclic Storage Program lets Watermaster import water during wet years at lower rates and bank it for future use—a key piece of Watermaster's stored-water strategy. Cyclic Storage now stands at about 228,800 acre-feet, roughly three times the long-term average, after years of proactive encouragement for Producers to build up their accounts. That reserve helped sustain groundwater levels through this year's imported water shutdown.

REVERSE CYCLIC STORAGE LOCKS IN FAVORABLE PRICING YEARS BEFORE WATER IS DELIVERED

Reverse Cyclic Storage lets MWD Member Agencies purchase imported water now at a locked-in price, giving MWD up to five years to deliver it once the State Water Project allocation rises above 40% or MWD otherwise determines water is available. Watermaster last used this tool in December 2022, and while no agreements are currently active, Reverse Cyclic Storage remains a valuable tool in Watermaster's portfolio.

OPERATING SAFE YIELD STAYS CONSERVATIVELY LOW TO PROTECT THE BASIN THROUGH CONTINUED UNCERTAINTY

Each year, Watermaster sets the Operating Safe Yield (OSY), the amount of groundwater production allowed before triggering a Replacement Water obligation that bears an assessment to fund imported water purchases to balance the Basin. A low OSY encourages conservation and builds funding for needed supply purchases, keeping both water supply and costs more stable and predictable.

Basin production has declined in recent years as end users have sustained drought-era conservation habits, helping keep supplies stable when imported deliveries ceased in September 2025.

Given these conditions, Watermaster has set the OSY at 160,000 acre-feet for fiscal year 2026–27, about 27,000 acre-feet below the long-term average, and uses 140,000 acre-feet as a worst-case planning figure for the following years before its next annual review.

***+60 feet:** the combined effect of Cyclic Storage, RDA water, and rainfall on the Key Well level.*

Morris Dam

Planning Today for Tomorrow's Basin

Watermaster has built a funding structure that that makes it possible to purchase water before it is needed, ensuring resources are ready for unexpected challenges. Over the next several years, Watermaster anticipates new pressures from mussel mitigation, climate variability, and emerging water quality requirements. Watermaster will continue to use adaptive management to anticipate those challenges and develop proportional responses.

THE REPLACEMENT WATER SURCHARGE ENCOURAGES PRODUCERS TO SECURE REPLACEMENT WATER BEFORE SHORTAGES OCCUR

The Replacement Water Surcharge supports supply resilience by encouraging Producers to anticipate their annual production and potential Replacement Water needs to secure imported water earlier, rather than waiting until shortages or price spikes force a costlier response. This helps Watermaster manage Basin supplies more efficiently and reduces exposure to last-minute scarcity.

THE THREE-YEAR PURCHASED WATER PLAN KEEPS SUPPLY PLANNING COORDINATED ACROSS THE BASIN

Each year, Watermaster develops a three-year projection of supplemental water purchases, drawing on Replacement Water obligations, the RDA program, the In-Lieu Program, the Operating Safe Yield, and Producer projects to anticipate imported water needs. Coordinating with the Responsible Agencies provides for a more regional approach to supply purchases, storage, and other strategies as conditions change.

PROTECTING WATER RIGHTS

The expansion of the San Gabriel Mountains National Monument in 2024 provided valuable protection for a unique wilderness area while preserving access to long-established, essential water rights. In 2025–26, Watermaster has actively monitored plans and engaged state and federal lawmakers to ensure similar protections for rights holders, consistent with the adjudication, are considered with the proposed PUBLIC Lands Act.

PURE WATER SOUTHERN CALIFORNIA OFFERS A LOCALLY CONTROLLED PATH TO LONG-TERM RELIABILITY

Pure Water is a joint recycled water initiative of Watermaster, MWD, and the Los Angeles County Sanitation Districts, using advanced treatment to transform treated wastewater that would otherwise be discharged to the ocean into clean, safe, high-quality water. At full scale, the project will process up to 150 million gallons of water a day, producing up to 160,000 acre-feet per year for industrial use and regional groundwater replenishment, including up to 80,000 acre-feet per year for the Main San Gabriel Basin.

> ***This year's disruption to imported water demonstrated why Pure Water matters. A drought-proof, locally controlled supply reduces the Basin's exposure to the kind of imported water interruptions Watermaster navigated this year, making continued development of Pure Water a cornerstone of the region's long-term resilience.***

The project passed a major milestone this year. On February 10, 2026, the Metropolitan Water District certified the project's final Environmental Impact Report, the culmination of five years of work and a key milestone under the California Environmental Quality Act.

A CRITICAL PROJECT THAT MUST BE BUILT

Watermaster has long viewed Pure Water as an essential piece of sustainable water management for Southern California, and has remained actively engaged, including through the ongoing advocacy of Executive Officer Kelly Gardner, in building the regional consensus and sustained support the project needs to keep moving through its multi-phase build-out.

Benefits of Pure Water Southern California

A locally controlled supply, reducing reliance on imported supplies

Drought-proof water

Reduced impact on watersheds during periods of high demand

Clean, reliable water for millions of regional residents

Significant local job creation and economic output during construction (40,000 jobs and $8.7 billion in regional investment)

Long-term supply stability regardless of climate impacts or rainfall variability

> ***Pure Water is an essential component of sustainable water management for Southern California and the San Gabriel Valley.***

Building a Future Water Quality Framework

PROTECTING BASIN WATER QUALITY AND ENSURING COMPLIANCE

Watermaster conducts regionwide water quality testing. Since 1974, Watermaster has conducted Title 22 water quality monitoring throughout the Basin— a rigorous, proactive program focused on early detection and remediation. Testing regionwide rather than site by site saves costs through economies of scale and gives Watermaster the basinwide insight to respond to water quality needs more quickly and effectively.

That regional testing builds the baseline that enables fast, cost-effective response when regulations change. Beyond required Title 22 testing, Watermaster proactively tests emerging constituents, including N-nitrosodimethylamine (NDMA), 1,4-dioxane, hexavalent chromium, and PFAS, as required, to establish early baselines for the good of the Basin. DDW issued new and revised notification levels for PFOA, PFOS, PFHxS, and PFHxA in October 2025. Available PFAS data in the Basin indicate exceedances of the notification levels in certain areas of the Basin, but those active wells already had PFAS treatment or recently installed PFAS treatment.

Watermaster continues watching ahead of the next round of regulations. It is tracking developing rules on manganese and other emerging constituents so the Basin stays prepared as detection technology improves and oversight agencies lower notification thresholds further.

Anticipating regulatory requirements keeps new costs from straining the budget. New EPA and California PFAS compliance monitoring requirements came into effect in 2025, requiring continued investment in monitoring and infrastructure. Because Watermaster invests ahead of need, the Basin absorbed this new requirement within its existing budget rather than facing it as a sudden added cost.

NEW WATER QUALITY MANAGEMENT MONITORING POLICY

In July 2025, the Board adopted a new Water Quality Management Monitoring Policy that formalizes Watermaster's long-standing practice of regular, proactive, basinwide water quality testing and monitoring. The policy ensures continued compliance with state and federal testing requirements and establishes long-term funding, review, and cost-sharing mechanisms for future contaminant monitoring needs.

OPERABLE UNIT CLEANUPS

Renewal of the BPOU Agreement is on track. The Baldwin Park Operable Unit currently operates under a 10-year Project Agreement signed in 2017. In 2025, Watermaster began discussions to renew that agreement, and discussions are on track to complete and approve the renewal in spring of 2027, before the May 2027 expiration date.

Whittier Narrows Operable Unit (WNOU) water use agreement extended. Supporting Watermaster's commitment to beneficial use of all treated groundwater, WNOU currently delivers treated water to Legg Lakes under an agreement with the Los Angeles County Department of Parks and Recreation and the Department of Toxic Substances Control. In June 2026, Watermaster negotiated another one-year extension to this agreement, ensuring the water remains beneficially used.

WATERMASTER'S 3D MODEL SUPPORTS WORK ACROSS THE BASIN

Watermaster's 3D groundwater model remains a vital tool for Basin management decisions, providing analysis and validation for water supply and quality management decisions and plans. The model also provides independent verification of BPOU cleanup progress, using Producer pumping and water-quality data to cross-check the modeling of the Cooperating Respondents or "responsible parties." This keeps cleanup decisions grounded in sound science and protects both the Basin's water and stakeholders' finances. In 2025–26, Watermaster staff worked with the Baldwin Park Operable Unit water entity group and representatives from the Environmental Protection Agency to discuss remedy modeling strategies and s upport evidence-based decision-making in the Basin.

BASIN WATER QUALITY BY THE NUMBERS

94 source wells sampled each month

34 treatment facilities currently in operation

72,000 acre-feet of water treated during fiscal year 2025-26

5,700 pounds of contaminants removed during fiscal year 2025-26

0 wells shut down due to detections during fiscal year 2025-26

Collaborative Relationships Are Key

WATERMASTER PROVIDES CONTRACT MANAGEMENT AND ADMINISTRATION FOR SEVEN ORGANIZATIONS

Rather than standing up their own administration, each of the seven organizations below draws on a single, experienced team already immersed in regional water affairs. The result is lower overhead for every party, more consistent administration, and a Watermaster that is even more closely connected to the agencies and interests it works beside every day.

SHARED STAFF, SHARED STRENGTH

Association of Groundwater Agencies (AGWA)
A coalition of Southern California groundwater basin managers advancing sound basin management and shared technical resources, in partnership with the American Ground Water Trust.

California Groundwater Coalition (CGC)
A statewide voice educating policymakers and advocating for a fair share of funding for groundwater programs.

Central Basin Water Association (CBWA)
A forum for Central Basin water agencies and stakeholders to coordinate on regional water issues.

Foothill Water Coalition (FWC)
A regional coalition coordinating shared supply and planning matters for foothill-area water interests to attract federal interest and funding opportunities.

Raymond Basin Management Board (RBMB)
The governing body for the adjudicated Raymond Basin, overseeing Basin operations including water rights and production.

San Gabriel Valley Protective Association (SGVPA)
Established in 1920 to hold and protect rights to local surface water, including from tributaries of the San Gabriel River system.

San Gabriel Valley Water Association (SGVWA)
A regional association convening local water agencies on legislative and industry matters.

MUSSEL RESPONSE ILLUSTRATES THE BREADTH OF COLLABORATION REQUIRED TO PROTECT THE BASIN

Since the first detection of golden mussels in 2024, Watermaster has worked with the three Responsible Agencies (Upper Water, San Gabriel Valley Municipal Water District (SGVMWD), and TVMWD), Producers, the California Department of Fish and Wildlife, the Metropolitan Water District, LA County Public Works, and the California Department of Water Resources to develop mitigation strategies. Watermaster also engaged outside engineering and environmental experts to stay proactive and keep the Court regularly informed. This coordination resulted in a Mussel Control Plan developed ahead of legal requirement, a cost-sharing agreement, a copper-based pretreatment inlet on the Devil Canyon Pipeline, and strategies for resumption of imported deliveries and monitoring at the San Gabriel Canyon Spreading Grounds.

COOPERATIVE APPROACH TO READINESS-TO-SERVE CHARGE

Upper Water pays MWD's Readiness-to-Serve (RTS) charge covering infrastructure costs, which is projected to rise to $10.1 million over the next decade. Watermaster and the Producers have agreed to cover this cost through the RDA, ensuring Upper Water can keep bringing water into the Basin even in years with lower sales.

ACTIVELY ENGAGED ACROSS THE REGION AND THE STATE

Groundwater does not respect jurisdictional lines, and neither does good basin management. Throughout the year, Watermaster works shoulder to shoulder with a broad network of agencies, associations, and coalitions to manage the Basin effectively.

CONTINUAL ENGAGEMENT WITH PARTIES IN THE BASIN

A strong partnership with the three Responsible Agencies named in the Judgment. Watermaster works closely with Upper Water, SGVMWD, and TVMWD, as well as MWD itself.

Watermaster also works with prescribed diverters of surface water. The Committee of Nine (San Gabriel River Water Committee) and the San Gabriel Valley Protective Association continue to have productive relationships with Watermaster and the Responsible Agencies.

Conservation of stormwater and river flow depends on close partnerships with the Los Angeles County Department of Public Works and Flood Control District, the County's Safe Clean Water Program Watershed Area Steering Committees and County Water Plan Task Forces, and the Greater Los Angeles County Integrated Regional Water Management effort to support shared stormwater and watershed goals.

Watermaster facilitated Central Basin Water Association (CBWA) Board meetings and organized its quarterly and annual membership meetings.

Watermaster also organized and participated in the SGVWA monthly board and legislative-committee meetings, including its quarterly membership meetings.

DEEPLY ENGAGED WITH REGIONAL AND STATE PARTNERS AND LEADERS

Watermaster carries the Valley's interests to the venues where water policy is shaped. Its leadership attended the Association of California Water Agencies (ACWA) conference in Sacramento, including the Joint Powers Insurance Authority membership meeting and California Groundwater Coalition Board meetings, and took part in ACWA Region 8 legislative planning and a dedicated ACWA Working Group on the golden mussel.

Working at the Capitol and the County. Watermaster's leadership met with State Senator Sasha Renée Pérez on the Basin's concerns about water shortage impacts from the stoppage of imported deliveries and also with representatives of Los Angeles County Board of Supervisors. Watermaster also tracked proposed Wild and Scenic River legislation on behalf of the Basin adjudication.

REACHING OUT ACROSS THE COMMUNITY

Watermaster brings Basin facts to the people it serves by helping lead the 2026 San Gabriel Valley Water Supply Tour sponsored by the Southern California Water Utilities Association and sharing its functions and responsibilities through social media to reach the water industry, community leaders, legislators, and consumers.

THE WATERS THAT CONNECT US CAMPAIGN

Watermaster's social media outreach supports local agency efforts. Watermaster's social media and newsletters focus on basinwide topics such as groundwater levels, the importance of Pure Water Southern California, and water quality, supporting retail agencies' local information. Watermaster also co-sponsors agency events, ensuring consistent, region-wide messaging and a unified story about Basin water management and conservation.

Continuing Excellence in Administration

Watermaster's excellent management ensures fiscal stability and reliable supply for the Parties.

PRUDENT FINANCIAL MANAGEMENT KEEPS BUDGET AND ASSESSMENTS STABLE

Watermaster reviews assessments annually in response to Basin management needs and production expectations. Based on current Basin conditions, assessments were unchanged this year.

The 2026–27 Budget was decreased by $0.5 million to $5.8 million for FY 2026–27, despite inflationary pressures and rising water costs.

Administration Assessment remains unchanged at $21/acre-foot since the 2023–24 water year. It funds crucial Watermaster activities, including routine and point-of-entry testing required under the new Water Quality Management Program Policy.

The In-Lieu Assessment was held at $5/acre-foot for the third year.
The In-Lieu Assessment funds Replacement Water purchases for the Basin under strategic pumping plans.

The Resource Development Assessment held steady for the sixth year. The RDA is Watermaster's most important lever for managing Basin production. Based on current circumstances, the Board held the RDA at $175 per acre-foot yet again.

Replacement Water Assessment remains stable. As required by the Judgment, individual Responsible Agencies set Replacement Water Assessments on overproduction and review rates annually.

CLEAN AUDIT REPORT FOR PREVIOUS FISCAL YEAR

Watermaster once again received a clean audit report. The report notes financial reporting "of the highest level" and finds that Watermaster is "operating well" and consistent with internal financial controls.

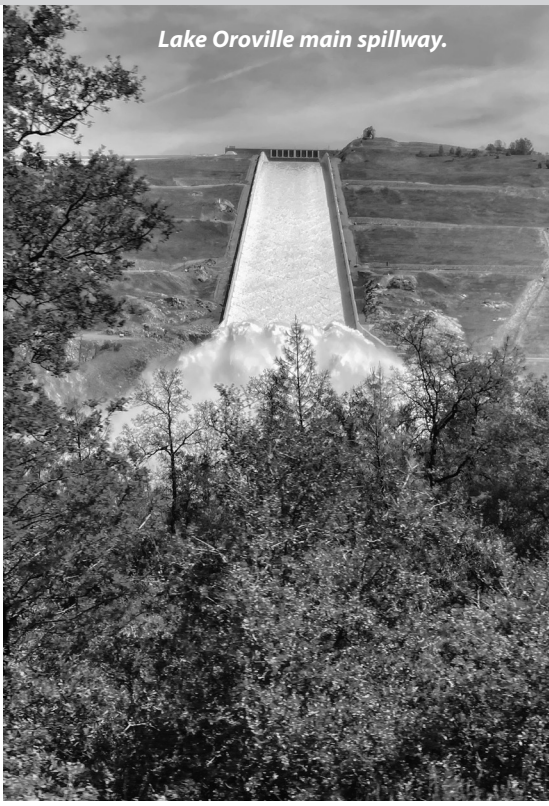

WATERMASTER MEETS TWICE WITH THE HONORABLE MAUREEN DUFFY-LEWIS

During the December 2025 status conference, Watermaster updated the presiding judge on Basin status, long-term planning, and the disruption from the mussel detection and delivery shutdown. Given the stakes for the Judgment-mandated physical solution, Watermaster met again in April 2026, with a third meeting scheduled for September 11, 2026.

Thank you, Martin Zvirbulis! In December, Watermaster issued a resolution thanking Mr. Zvirbulis for his years of service to the Basin as a Board Member, Officer, and Producer Member.

Welcome, former intern Jocelyn Garcia! Ms. Garcia started as a Water Resources Analyst I in April 2026, the first participant in Watermaster's Student Internship Program to become a full-time employee.

Welcome Justin Nakano, the recently hired Director of Water Resources.

Lake Oroville main spillway.

LOWER AREA CREDIT REMAINS HIGH DESPITE LOWER DELIVERIES

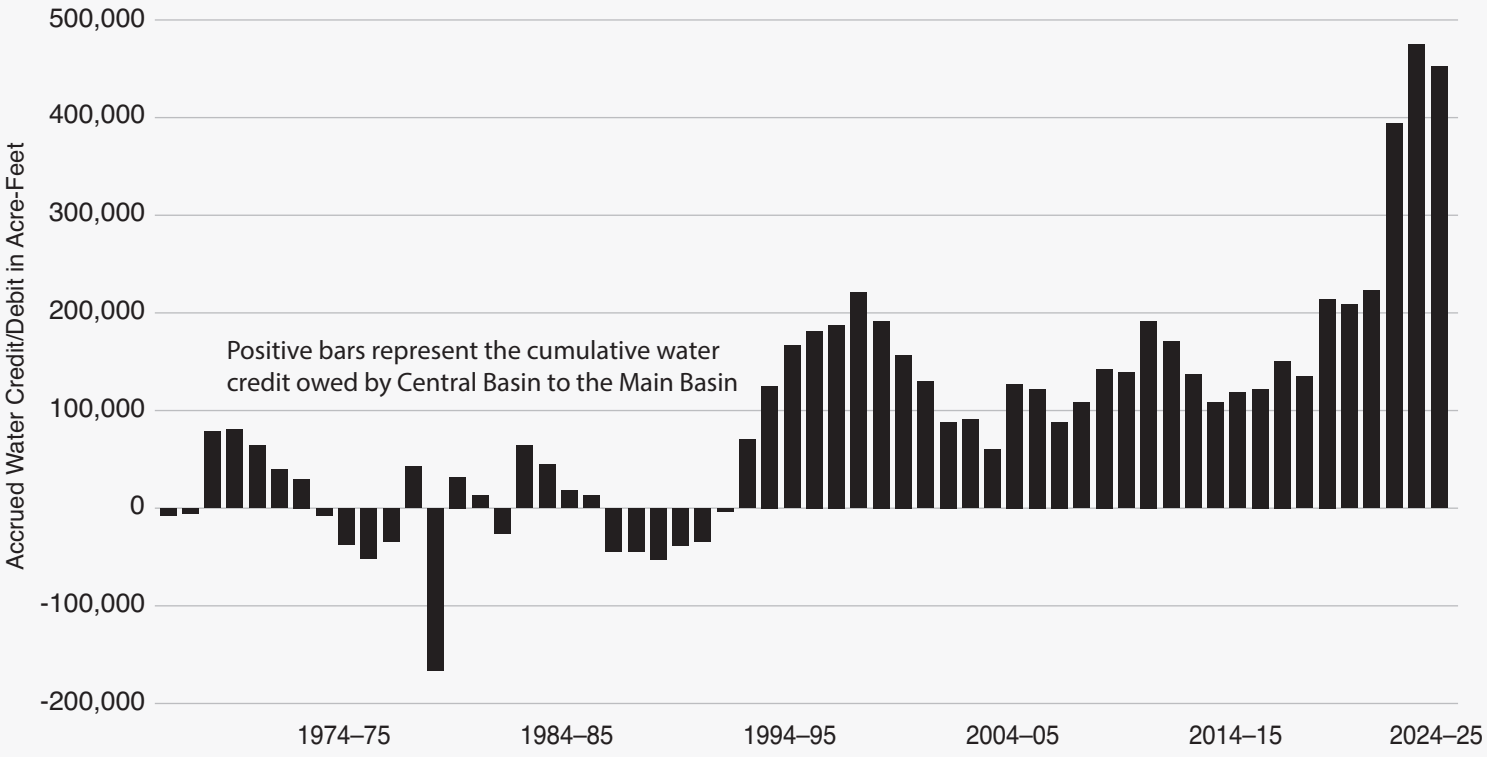

Since the early 1990s, the Lower Area (the Central Basin downstream of Whittier Narrows) has received substantially more water than the Judgment provides, resulting in a growing water credit to the Main Basin.

Under the Judgment, the Lower Area is entitled to 50% of usable water from the shared watershed, based on 10-year rainfall averages. In its most recent annual report, for water year 2024–25, the San Gabriel River Watermaster calculated that entitlement at 86,400 acre-feet. Deliveries for the same year were 69,447 acre-feet, which reduced the credit by 16,953 acre-feet. Despite this decrease, the outstanding balance stands at 451,899 acre-feet as of September 30, 2025.

Dynamic Basin hydrology, unpredictable rainfall, and imported water reliability impacts all factor into the need to resolve this ongoing deficit for the benefit of all parties. Watermaster is committed to a fair resolution in collaboration with San Gabriel River Watermaster, the San Gabriel Valley Protective Association, and regional agencies.

Watermaster continues to maintain the Make-up Water Fund to support future Replacement Water for the Lower Area if conditions change.

Upper Area's annual accrued water debit/credit of usable water received by Lower Area

Positive bars show over delivery from the Main Basin to the Central Basin based on the Judgment. At the end of the 2024–25 water year, the Central Basin had accrued a cumulative water credit to the Main Basin of 451,899 acre-feet—a decrease of about 17,000 acre-feet over the previous water year.

Managing and Protecting the Basin

Created by the 1973 Judgment and accountable to the Los Angeles County Superior Court and community, the nine-member Watermaster Board and staff manage and protect the Main San Gabriel Basin. Its core responsibilities and powers are shown here.

Authority and Mandate

- Created by the 1973 Judgment
- Governed by a nine-member board, appointed by and accountable to the Los Angeles County Superior Court
- Administers and enforces the Judgment
- Manages the Basin efficiently; protects water rights and groundwater quality

Managing Water Quantity

- **Sets** the annual Operating Safe Yield (OSY)
- **Raises** replenishment revenue through production assessments
- **Controls** all spreading of replenishment water
- **Directs** imported water, local runoff, and surplus river flow into storage
- **Stores and draws water** via the RDA, Cyclic Storage, and Letter Agreements

Protecting Water Quality

- **Coordinates** groundwater quality protection and restoration
- **Monitors** under Title 22; tracks PFAS, hexavalent chromium, and more
- **Supports** Operable Unit cleanups
- **Prepares** the annual Five-Year Water Quality and Supply Plan
- **Reviews and approves** new production and treatment facilities

Partnering and Reporting

- **Partners** with the Los Angeles County Flood Control District on replenishment
- **Coordinates** with many organizations in and around the Basin and across the region and state
- **Collects and analyzes** production, water-quality, and hydrologic data valley-wide
- **Publishes** this annual report, the record of its stewardship

APPENDIX A

SUMMARY OF WATERMASTER ACTIONS FISCAL YEAR 2025–2026

APPENDIX A

CHRONOLOGICAL SUMMARY OF WATERMASTER ACTIONS
FISCAL YEAR 2025-26

Cyclic Storage

On July 2, 2025, Watermaster authorized the purchase of 5,000 acre-feet of cyclic storage water from Upper San Gabriel Valley Municipal Water District (USGVMWD) for California American Water's individual Producer cyclic storage account.

On August 6, 2025, Watermaster authorized the purchase of 1,800.00 acre-feet of cyclic storage water from Three Valleys Municipal Water District (TVMWD) and 100.00 acre-feet from USGVMWD for the City of Glendora's individual Producer cyclic storage account.

On October 1, 2025, Watermaster authorized the purchase of 2,351.92 acre-feet of cyclic storage water from USGVMWD for the City of Arcadia's individual Producer cyclic storage account.

On December 10, 2025, Watermaster authorized the purchase of 100.00 acre-feet of cyclic storage water from USGVMWD for La Puente Valley County Water District's individual Producer cyclic storage account.

On February 4, 2026, Watermaster authorized the establishment of an individual Producer cyclic storage account with a 3,000 acre-feet limit for Covina Valley Water Company.

Water Quality Management Monitoring Program

On July 2, 2025, Watermaster received and filed the Water Quality Management Monitoring Program, intended to serve as a guideline for the processing of future contaminant monitoring and the appropriate funding mechanisms for testing through Watermaster. .

On September 3, 2025, Watermaster authorized staff to proceed with Environmental Protection Agency (EPA) Per- and Polyfluoroalkyl Substances (PFAS) Maximum Contaminant Level (MCL) compliance and monitoring in accordance with the Water Quality Monitoring Program Policy.

On October 1, 2025, Watermaster approved the revised Water Quality Monitoring Program Policy, which includes sampling at point of entry, and approved the expenditures associated with PFAS MCL compliance monitoring within the approved Watermaster budget.

Public Hearing on Public Health Goals (New)

On August 6, 2025, Watermaster conducted a public hearing in accordance with Section 116470 of the California Health and Safety Code on the Public Health Goal reviews prepared for twelve water systems within the Main San Gabriel Basin. No comments were received.

Resolution Commemorating Darin Kasamoto Upon His Retirement

On August 6, 2025, Watermaster approved Resolution No. 08-25-340, a resolution expressing appreciation, commemorating and inviting public attention to the outstanding services rendered by Mr. Darin Kasamoto upon the occasion of his retirement from San Gabriel Valley Municipal Water District (SGVMWD).

Employee Handbook

On August 6, 2025, Watermaster adopted the revised Employee Handbook, updated from the 2014 version to comply with changes in state and federal labor laws.

Succession Plan (Organizational Chart and Classification and Compensation Study)

On August 6, 2025, Watermaster adopted the revised organizational chart and authorized the Executive Officer to engage a classification and compensation consultant to review the existing framework.

La Puente Valley County Water District Waiver of Assessment

On September 3, 2025, following a public hearing on the same day, Watermaster approved the waiver of the Replacement Water Assessment associated with La Puente Valley County Water District's Puente Valley Operable Unit Intermediate Zone (PVOU-IZ) treatment facility operations and discharge to San Jose Creek during FY 2024-25, totaling 352.39 acre-feet.

Blaine Tech Services Contract Renewal

On September 3, 2025, Watermaster authorized the Executive Officer to sign a three-year renewal contract with Blaine Tech Services for the Baldwin Park Operable Unit (BPOU) Project.

Joint Representation Agreement for BPOU Project Agreement Renewal

On September 3, 2025, Watermaster authorized the Executive Officer to sign the Joint Representation Agreement for Legal Services between the Main San Gabriel Basin Watermaster, San Gabriel Basin Water Quality Authority (WQA), and Nossaman LLP for the BPOU Project Agreement Renewal.

Three-Year Purchased Water Plan

On October 1, 2025, Watermaster received and filed the Three-Year Purchased Water Plan for Fiscal Years 2025-26 to 2027-28 as presented.

Audit Report

On October 1, 2025, Watermaster received and filed the FY 2024-25 audit report as presented by CliftonLarsonAllen (CLA).

Cash Investment Policy

On October 1, 2025, Watermaster reaffirmed its Cash Investment Policy.

Golden Mussel Control Plan

On October 1, 2025, Watermaster authorized the Executive Officer to sign a Cost-Sharing Agreement among Watermaster, SGVMWD, TVMWD, and USGVMWD for the Golden Mussel Control Plan, with a committed contribution of $12,500.

On June 3, 2026, Watermaster authorized the Executive Officer to approve up to $50,000 in expenditures related to the preliminary costs associated with the implementation of the Golden Mussel mitigation and monitoring plan.

Election of Producer Nominees and Appointment of Public Representatives

On November 5, 2025, the Parties elected Melissa Barbosa, Paul Cranmer, Cris Fealy, Garry Hofer, David Michalko, and Lynda Noriega as Producer Members for Court appointment to Watermaster for calendar year 2026.

On November 5, 2025, Watermaster received the certifications of appointment of Steven T. Placido by SGVMWD, and Dr. Anthony Fellow and Jennifer Santana by USGVMWD, as Public Representatives for calendar year 2026. The nominees were confirmed at a hearing before Presiding Judge Maureen Duffy-Lewis on December 5, 2025.

Annual Report Completed

On November 5, 2025, in accordance with Section 36 of the Judgment, Watermaster received the FY 2024-25 Annual Report and filed it with the Court and Parties.

Resource Development Assessment (RDA)

On November 5, 2025, Watermaster's Consulting Engineer reported that in fiscal year 2024-25 Watermaster collected funds from the RDA for Storm Water Augmentation Program (RDA II), for a total of $33,094,931.31. Watermaster authorized the Executive Officer to make the appropriate purchases for reliability storage water supply. The estimated requirement for delivery during fiscal year 2025-26 is a total RDA delivery of 30,904 acre-feet.

Replacement Water

On November 5, 2025, Watermaster authorized the purchase of Replacement Water from the appropriate Responsible Agencies for overproduction from the Basin during fiscal year 2024-25.

Resolution Commemorating Martin Zvirbulis

On December 10, 2025, Watermaster approved Resolution No. 12-25-341, a resolution expressing appreciation, commemorating and inviting public attention to the outstanding services rendered by Mr. Martin Zvirbulis during his tenure as a Board Member, Officer and Producer Member of Watermaster.

Well Treatment Facility Application Approval

On December 10, 2025, Watermaster approved Golden State Water Company's application for a Water Treatment Facility at Farna Wells No. 1 and No. 2, and Persimmon Well No. 1, subject to the conditions in the staff report.

On April 1, 2026, Watermaster approved San Gabriel Valley Water Company's application for a Water Treatment Facility at its Wells 1B, 1D, 1E, and 1F, subject to the conditions in the staff report.

Election of Officers

On January 7, 2026, Watermaster elected its 2026 Officers: Lynda Noriega, Chair; David Michalko, Vice Chair; Cris Fealy, Secretary; and Melissa Barbosa, Treasurer.

Five-Year Plan

Following a public hearing on January 7, 2026, Watermaster adopted the Five-Year Water Quality and Supply Plan (Five-Year Plan), which was received and presented to Watermaster in detail on November 5, 2025.

Resolution Supporting Pure Water Southern California

On January 7, 2026, Watermaster approved Resolution No. 01-26-342, a resolution supporting Pure Water Southern California and the efforts of the Metropolitan Water District of Southern California (MWD) and the Los Angeles County Sanitation Districts.

Replacement Water/Surcharge Accounting

On January 7, 2026, Watermaster received and filed the Replacement Water/Surcharge Accounting. Watermaster adjusted the affected Producer production rights for FY 2025-26 and has requested that TVMWD deliver 4.7 acre-feet of water at the 2025 rate of $912.00 per acre-foot from its current cyclic account or transfer from the water pre-delivered during calendar year 2025; and

USGVMWDthat USGVMWD deliver 13.84 acre-feet of water at the 2025 rate of $1,015.00 per acre-foot from its cyclic account or transfer from the cyclic water pre-delivered as part of the 2024 letter agreement.

Golden Meters Agreement Extension

On April 1, 2026, Watermaster authorized a two-year renewal of the Golden Meters Agreement for testing of production meters.

Administration Budget

On April 1, 2026, Watermaster received and filed the Preliminary Draft Administration Budget and Assessments for FY 2026-27.

Watermaster Retirement Plan

On April 1, 2026, Watermaster adopted Resolution No. 04-26-343, approving and adopting the Governmental Executive Retirement Plan.

Operating Safe Yield

On April 1, 2026, Watermaster received and filed the Preliminary Determination of Operating Safe Yield report for FY 2026-27 through 2030-31.

On May 13, 2026, Watermaster conducted a public hearing and approved Resolution No. 05-26-345, establishing an Operating Safe Yield of 160,000 acre-feet for FY 2026-27 and 140,000 acre-feet for each of the following four years (FY 2027-28 through FY 2030-31).

Stipulation Re Intervention After Judgment

On April 1, 2026, Watermaster approved the Stipulation Re Intervention After Judgment of the San Gabriel Band of Mission Indians Led by the Gabrieleno Tongva Tribal Council.

Watermaster Assessments and Administration Budget

On May 13, 2026, Watermaster approved Resolution No. 05-26-344, adopting the Administration Budget for FY 2026-27 as presented in the amount of $5,804,028.00. The Administration Assessment was set at $21.00 per acre-foot; the In-Lieu Assessment was set at $5.00 per acre-foot; and the RDA was set at $175.00 per acre-foot on fiscal years 2025-26 and 2026-27 Production. The Replacement Water Assessment for fiscal year 2025-26 and fiscal year 2026-27 was set at $260.00 and $280.00per acre-foot, respectively, for excess production within SGVMWD; at $1,116.00 and $1,170.00 per acre-foot, respectively, for excess production within TVMWD; and at $1,187.00 and $1,233.00 per acre-foot, respectively, for excess production within USGVMWD.

Resolution Authorizing Investment of Watermaster Monies in Local Agency Investment Fund

On June 3, 2026, Watermaster approved Resolution No. 06-26-346, authorizing investment of Main San Gabriel Basin Watermaster Monies in the Local Agency Investment Fund (LAIF).

Whittier Narrows Operable Unit (WNOU) Extension Agreement

On June 3, 2026, Watermaster authorized the Executive Officer to sign a one-year extension of the Water Production Agreement with the Los Angeles County Department of Parks and Recreation and the Department of Toxic Substances Control relative to the WNOU.

Weck Laboratories Contract Renewal

On June 3, 2026, Watermaster authorized a two-year renewal of the existing Title 22 and BPOU Laboratory Contract with Weck Laboratories, with no change in the conditions and unit analytical prices as specified in the renewal contract.

Other Approvals, Authorizations and Filings

On November 5, 2025, Watermaster received and filed the 2026 Watermaster Board of Directors meeting dates.

On February 4, 2026, Watermaster received and filed the 2026 Watermaster Committee Assignments and Representatives to Outside Organizations.

Outside Activities: Watermaster Presented, Organized, Facilitated, Attended, Etc.

On Monday, July 7, 2025, attended the Spadra Basin Groundwater Sustainability Agency (GSA) meeting reviewing comments on addressing fringe areas adjacent to the Basin.

On Tuesday, July 8, 2025, met with representatives from the Puente Basin Water Agency (PBWA) to discuss the RDA and potential revisions to their Storage and Export Agreement.

On Wednesday, July 9, 2025, attended the USGVMWD Board Meeting. Discussions included an update on MWD activities and priorities.

On Monday, July 14, 2025, attended the USGVMWDSGVMWD Board Meeting. This was the first meeting for new GM Jose Reynoso and discussions included a potential agreement to purchase water from MWD for storage in the Main Basin.

On Wednesday, July 16, 2025, attended the USGVMWD Government Affairs and Community Outreach Committee meeting where discussions included a legislative update from their federal and state lobbyists.

On Thursday, July 17, 2025, met with representatives from Capital Core, an advocacy consultant, regarding the local impacts of the impending Golden Mussel infestation.

On Tuesday, July 22, 2025, attended the MWD Pure Water Southern California workshop where the Committee discussed concerns about the cost and actual need for the full development of the project.

On Tuesday, July 29, 2025, met with Stetson Engineers and Martin Rauch to begin the development of the 2024-25 Annual Report.

On Monday, August 11, 2025, attended the SGVMWD Board Meeting where the Board authorized the General Manager to purchase 5,000 acre-feet of cyclic storage water from MWD.

Also on the 11th, participated in the San Gabriel River Watershed project meeting where the group discussed the ongoing temperature study and flow regimes, followed by a meeting with Pablo Garza from Assemblymember Papan’s office to discuss AB 1413 and its potential impacts on adjudicated basins.

On Tuesday, August 12, 2025, participated in the Los Angeles County Water Plan Watershed Planning group meeting to discuss targets and goals for implementation.

On Wednesday, August 13, 2025, attended the USGVMWD Producer Meeting where discussion included supply information and strategies on the Golden Mussel infestation.

Later on the 13th, attended the USGVMWD Board Meeting to hear a presentation from MWD Chair Adan Ortega on the CAMP4Water process.

On Thursday, August 14, 2025, presented information regarding the challenges to the region in mitigating and managing the Golden Mussel to the Los Angeles County Water Plan's Regional Water Supply and Storage task force.

Later on the 14th, participated in a meeting with Flood Control executives regarding Watermaster's expectations for continued imported water deliveries in spite of the Golden Mussel presence. After this meeting, Watermaster held the Responsible Agencies/Watermaster Golden Mussel Mitigation Plan meeting.

On Monday, August 18, 2025, attended the MWD Engineering, Operations and Technology Committee meeting. The Committee discussed MWD's plans for Capital Improvement Budgets as well as their planning efforts for the Golden Mussel.

On Tuesday, August 19, 2025, attended the San Gabriel River Water Committee Board Meeting.

Also on the 19th, attended the MWD Board Meeting and provided comments on the importance of the Pure Water Southern California project to the San Gabriel Valley.

On Wednesday and Thursday, August 20-21, 2025, attended the Urban Water Institute's Annual Conference in San Diego. The conference included various topics including the importance of mutual aid for emergencies as seen during the Eaton Fire, cybersecurity, and panels featuring the new EPA Region 9 administrator, Josh Cook, Karla Nemeth and Jennifer Pierre discussing the importance of regional and statewide initiatives for reliability.

While at the conference, participated in a meeting with MWD and its member agencies strategizing on Golden Mussel mitigation and management including next steps for coordination with other regulatory agencies.

On Monday, August 25, 2025, participated in a meeting with a county consultant seeking input on regional coordination, opportunities to improve communications and Watermaster's perspective on challenges known and anticipated.

On Wednesday, August 27, 2025, participated in a meeting with the City of Glendora to discuss system operations and alternatives should a State Water Project (SWP) shutdown occur.

Also on the 27th, participated in a meeting with representatives from EPA regarding Watermaster's request for additional testing and monitoring of the Lario Park site for water quality protection.

On Tuesday, September 2, 2025, participated in a meeting with Tom Love, Matt Litchfield and Jose Reynoso regarding the development of the Golden Mussel Mitigation Plan.

Also on the 2nd, attended the Spadra Basin GSA Meeting, reviewing deficiencies submitted on its Groundwater Sustainability Plan (GSP).

On Wednesday, September 3, 2025, attended the TVMWD Board Meeting where they discussed upcoming capital improvement projects (CIPs) and MWD scheduled shutdowns, as well as the Golden Mussel impacts.

Also on the 3rd, attended the San Gabriel Valley Council of Governments (COG) Energy, Environment and Natural Resources Committee meeting where the group primarily discussed energy and fire-related legislative updates.

And later on the 3rd, attended a meeting with the Governor's office as part of the California Groundwater Coalition, discussing concerns with AB 1413.

On Monday, September 8, 2025, attended the SGVMWD Board Meeting where they discussed the basis of the Alhambra Exchange Agreement.

On Tuesday, September 9, 2025, participated in a regular bi-monthly meeting with Los Angeles County Public Works (LACPW) staff discussing collaboration and project updates.

Also on the 9th, participated in the WNOU project committee meeting.

Later on the 9th, attended the MWD Board Meeting and provided comments supporting their prioritization of the Pure Water Southern California project.

On Wednesday, September 10, 2025, attended the TVMWD Managers meeting and received information on their current and planned CIPs, budget and approach for mitigating the Golden Mussel.

Later on the 10th, attended the USGVMWD Producer meeting where discussion included MWD storage updates, projections for rate setting and the Golden Mussel Task Force.

On Monday, September 15, 2025, participated in a meeting with representatives from the City of Irwindale discussing potential material placement at the Olive Pit and the requisite permitting.

On Tuesday, September 16, 2025, attended the Golden Mussel group meeting with the Responsible Agencies and MWD discussing the proposed mitigation plan in progress.

On Wednesday, September 17, 2025, attended the TVMWD Board meeting that featured a detailed recap of the year's legislative actions impacting the region.

On Tuesday, September 23, 2025, attended the El Monte Operable Unit (EMOU) project meeting receiving an update on the status of the remedy and proposed enhancements for greater contaminant containment and extraction.

On Thursday, September 25, 2025, attended the Southern California Water Utilities Association (SCWUA) meeting featuring keynote speaker George Di Giovanni of MWD, who discussed the Golden Mussel infestation impacting the State Water Project system.

On Wednesday, October 1, 2025, completed and graduated from the professional program, "Leadership Essentials for the Water Industry Managers" through the Association of California Water Agencies (ACWA) Joint Powers Insurance Authority.

On Thursday, October 2, 2025, participated in a Cyber Training session with Highroad IT.

On Monday, October 6, 2025, attended USGVMWD's Water Resources and Facilities Planning Committee meeting.

On Tuesday, October 7, 2025, participated in the COG Water Working Group meeting.

On Wednesday, October 8, 2025, attended the Regional Water Reuse Collaborative meeting.

Also on the 8th, participated in a State Contractors Meeting regarding Golden Mussel impacts on the State Water Project.

On Tuesday, October 14, 2025, participated in multiple meetings with the County and partners including the California Department of Fish and Wildlife on the Golden Mussel Mitigation Plan.

Also on the 14th, attended the MWD Board Meeting to provide public comment relative to the prioritization of the Pure Water Southern California project.

On Wednesday, October 15, 2025, participated in TVMWD's Board of Directors meeting.

Also on the 15th, participated in the USGVMWD's Producer meeting.

On Thursday, October 16, 2025, coordinated Watermaster's "Great ShakeOut" event for emergency and disaster preparedness.

On Tuesday, October 21, 2025, participated in the Committee of Nine meeting.

On Wednesday, October 22, 2025, attended the San Gabriel Valley Water Company's ribbon cutting ceremony for the newly in-service, state-of-the-art treatment system at Plant B6 in Baldwin Park.

Also, on the 22nd, attended the USGVMWD Board of Directors meeting where the discussion included the appointment of USGVMWD's representatives to the Watermaster Board for calendar year 2026.

On Tuesday, October 28, 2025, participated in a meeting with the County on the Golden Mussel Control Plan that included an update on agreements, funding and next steps.

On Wednesday, October 29, 2025, met with the Vice Chair and Assistant Secretary from the San Gabriel River Water Committee (SGRWC) regarding the SGRWC's request to borrow water.

Also, on the 29th, attended the Puente Valley Operable Unit meeting at the WQA where the responsible parties provided project updates.

Later, on October 29th, attended the San Gabriel River West Fork Working Group Semi-Annual Meeting.

On Thursday, October 30, 2025, attended TVMWD's 75th Anniversary Gala at the Kellogg West Conference Center.

On Monday, November 3, 2025, participated in a Habitat Management Committee meeting where the discussion included a 2025 fall monitoring event for the San Gabriel River Watershed Project to reduce river discharge in support of increased recycled water reuse.

Also on the 3rd, attended the Spadra Basin Executive Committee meeting.

Later on the 3rd, attended the USGVMWD's Water Resources and Facilities Planning Committee meeting.

On Tuesday, November 4, 2025, participated in a regular bi-monthly meeting with LACPW staff discussing collaboration and project updates.

Also on the 4th, met with Suburban Water Systems to discuss their cyclic storage agreement.

Additionally on the 4th, participated in a meeting with the County regarding the Golden Mussel.

Later on the 4th, attended the USGVMWD Administration and Finance Committee meeting.

On Wednesday, November 5, 2025, attended the TVMWD Board of Directors meeting.

Also on the 5th, participated in a meeting with the County regarding their current spreading agreement.

Later on the 5th, attended the San Gabriel Valley COG Energy, Environment and Natural Resources Committee meeting.

Additionally on the 5th, attended the USGVMWD Government Affairs and Community Outreach

Committee meeting.

On Monday, November 10, 2025, attended the SGVMWD Board of Directors meeting.

Also on the 10th, met with Mr. Deven Upadhyay, General Manager, MWD, regarding a speaking engagement at the San Gabriel Valley Water Association's (SGVWA) Annual Membership meeting on November 13, 2025.

On Wednesday, November 12, 2025, attended TVMWD's General Manager's meeting and received information on their operations and planned projects.

Later that morning, coordinated Watermaster's annual ACWA Joint Powers Insurance Authority Assessment.

Also on the 12th, attended USGVMWD's Producer Meeting where the discussion included a legislative wrap-up and adoption of a resolution commemorating Mr. Ruben Gallegos upon his retirement.

Later in the day, attended the USGVMWD Board of Directors meeting.

On Tuesday, November 18, 2025, attended the San Gabriel River Water Committee board meeting.

Also on the 18th, attended MWD's Special Joint Meeting of the Executive Committee and Board of Directors.

On Wednesday, November 19, 2025, participated in TVMWD's Board of Directors meeting where they discussed their final 2025 Multi-jurisdictional Hazard Mitigation Plan, legislative and project updates.

On Thursday, November 20, 2025, participated in the Council of Governments Board of Directors meeting.

On Monday, November 24, 2025, participated in the Regional Water Reuse Collaborative meeting.

From Monday, December 1, 2025, through Thursday, December 4, 2025, attended the ACWA Fall Conference in San Diego. Meeting information included updated JPIA insurance rates and acknowledgments, and water industry trends such as PFAS, SGMA compliance and invasive species.

On Friday, December 5, 2025, participated in a Status Conference with the adjudication's Presiding Judge, the Honorable Maureen Duffy-Lewis on Main San Gabriel Basin conditions and impact of the Golden Mussel issue on supplemental replenishment operations.

Later that day, met with USGVMWD, TVMWD, SGVMWD, and Stetson Engineers regarding the Golden Mussel mitigation plan.

On Tuesday, December 9, 2025, provided comments at the MWD Board Meeting relating to Pure

Water and a commendation of outgoing General Manager, Deven Upadhyay.

On Wednesday, December 10, 2025, attended the TVMWD Managers Meeting where an update on imported supplies and impacts from the Golden Mussel infestation were discussed.

Later on the 10th, attended the USGVMWD Board of Directors Meeting that included a resolution honoring Ms. Evelyn Rodriguez on her retirement.

On Thursday, December 11, 2025, attended the SCWUA Holiday Luncheon.

On Tuesday, December 16, 2025, met with representatives from the California Groundwater Coalition on legislative strategies to assist with Golden Mussel challenges.

On Thursday, December 18, 2025, met with Ortega Strategies Group where they discussed legislative matters and engagement strategies.

On Friday, December 19, 2025, participated in a meeting with Nossaman regarding legislation related to the California Wild and Scenic Act.

Later on the 19th, met with Watermaster Attorney Fred Fudacz regarding the Golden Mussel issue with the County of Los Angeles. Mr. Fudacz had a meeting with County Counsel and their outside counsel regarding the County's position.

On Tuesday, December 30, 2025, met with representatives from the partnership group on the Golden Mussel plan.

On Monday, January 5, 2026, attended the Spadra Basin Executive Committee meeting where the discussion included approval of the Small Groundwater Sustainability Agency (GWSA) Coalition Cost-Share Agreement.

On Tuesday, January 6, 2026, participated in a regular bi-monthly meeting with LACPW staff discussing collaboration and project updates.

Also on the 6th, attended the USGVMWD Administration and Finance Committee meeting.

On Wednesday, January 7, 2026, attended the San Gabriel Valley COG Energy, Environment and Natural Resources Committee Meeting and presented an update on the challenges related to the County shutdown because of the Golden Mussel.

On Monday, January 12, 2026, attended the SGVMWD Board of Directors meeting, which included the election of officers and appointment of committees and outside agency representatives for calendar year 2026.

Later on January 12th, met with representatives from Rowland Water District and Walnut Valley Water District regarding the current Storage and Export Agreement.

Also, on January 12th, met with representatives from Los Angeles County Supervisor Janice Hahn's office regarding the Golden Mussel.

On Tuesday, January 13, 2026, provided comments at MWD Board of Directors Meeting relating to the Pure Water Southern California project.

Also on the 13th, coordinated Watermaster's staff on-site First Aid/CPR/AED training.

Also on the 14th, attended USGVMWD's Board of Directors meeting that included a Resolution of Support for MWD's Pure Water Southern California.

On Thursday, January 15, 2026, met with Ortega Strategies Group and discussed legislative priorities that included the San Gabriel Mouintain Mountains, Foothill and Rivers Act.

On Wednesday, January 21, 2026, attended the TVMWD Board of Directors meeting.

On Thursday, January 22, 2026, attended a welcome and introductory breakfast for newly appointed General Manager, MWD, Mr. Shivaji Deshmukh.

Also on January 22nd, met with Mr. Mark Pestrella, Director, LACPW, regarding the Golden Mussel.

On Monday, January 26, 2026, attended the Municipal Water District of Orange County's Water Policy Forum and Dinner that included keynote speaker Mr. Deshmukh.

On Tuesday, January 27, 2026, participated in the Groundwater Replenishment Working Group (GWRCG meeting).

On Wednesday, January 28, 2026, participated in the El Monte Operable Unit Stakeholder and Technical meeting.

Also on January 28th, participated in the Six Basins Watermaster Board meeting that included an update on the State Water Project – Golden Mussel.

On Thursday, January 29, 2026, participated in a meeting with Ms. Tiffany Tran, Public Works Deputy to Los Angeles County Supervisor Kathryn Barger.

On Monday, February 2, 2026, participated in a Groundwater Sustainability Agency (GSA) adjudication informational meeting with IB Consulting.

Also, on February 2nd, attended the USGVMWD Water Resources and Facilities Planning Committee meeting, where the discussion included the Urban Water Management Plan Process.

On Tuesday, February 3, 2026, attended USGVMWD's Administration and Finance Committee meeting, where the discussion included the 2026-27 budget schedule and quarterly investment update.

On Wednesday, February 4, 2026, attended the TVMWD Board of Directors meeting.

Also on the 4th, coordinated a meeting of the development team regarding next steps related to the Golden Mussel plan submission.

Later on the 4th, coordinated a meeting with Ortega Strategies Group and the speakers regarding the SGVWA Quarterly Membership meeting on February 12, 2026.

On Friday, February 6, 2026, met with representatives from Los Angeles County Supervisor Hilda Solis' office regarding the Golden Mussel.

On Monday, February 9, 2026, attended the SGVMWD Board of Directors meeting.

On Tuesday, February 10, 2026, attended the MWD Board of Directors meeting where the Executive Officer provided comments relating to the Pure Water Southern California project.

Also on the 10th, participated in a PFAS Field Blanks meeting.

On Wednesday, February 11, 2026, attended the TVMWD Member Agency Managers meeting.

Also on February 11th, attended the San Gabriel Valley COG Energy, Environment and Natural Resources Committee Meeting.

Later that morning on February 11th, attended the USGVMWD Producer meeting.

Later that day on the 11th, attended the USGVMWD's Board of Directors meeting, where the discussion included federal bill positions and a mid-year financial report.

On Thursday, February 12, 2026, coordinated a meeting with TVMWD regarding the City of Glendora's Cyclic Cost Offset Program.

On Tuesday, February 17, 2026, attended the Committee of Nine Board of Directors meeting.

Later that morning on the 17th, coordinated a Golden Mussels Partners Meeting.

Later in the day of the 17th, coordinated a meeting with Stetson Engineers, SGVMWD and the City of Palmdale regarding the Golden Mussel Monitoring and Control Plan.

Also on the 17th, participated in a San Gabriel Valley Golden Mussel Control Plan Follow-up meeting with SGVMWD, California Department of Fish and Wildlife, Stetson Engineers, USGVMWD and TVMWD.

On Wednesday and Thursday, February 18 and 19, 2026, attended the Association of Ground Water Agencies/American Ground Water Trust Conference in Ontario. Speakers presented information on new technologies, enhanced mapping and modeling tools as well as treatment processes for emerging contaminants.

On Friday, February 20, 2026, coordinated a meeting with Mr. Ian Prichard, Deputy General Manager, Calleguas Municipal Water District, regarding an upcoming speaking engagement on adjudicated basins.

On Monday, February 23, 2026, attended the Council of Governments Joint Water Working and Public Works meeting.

From Tuesday, February 24, 2026, through Thursday, February 26, 2026, attended ACWA Annual Conference in Washington, D.C.

On the 24th, participated in the California Groundwater Coalition (CGC) Legislative Meeting.

On Wednesday, February 25, 2026, attended the Public Water Agencies Group meeting.

On Thursday, February 26, 2026, attended TVMWD's Leadership Breakfast.

On Monday, March 2, 2026, participated in a Spadra GWSA Executive Committee meeting.

On Tuesday, March 3, 2026, participated in a regular bi-monthly meeting with LACPW staff discussing collaboration and project updates.

On Wednesday, March 4, 2026, attended the TVMWD Board of Directors meeting.

Also on March 4th, attended the San Gabriel Valley COG Energy, Environment and Natural Resources Committee Meeting.

On Monday, March 9, 2026, attended the SGVMWD Board of Directors meeting.

On Tuesday, March 10, 2026, attended the Los Angeles County Water Plan Nature-Based Solutions Task Force: Phase 2 Meeting where the discussion included reviewing existing metrics from Phase 1.

Later that morning on the 10th, attended the MWD Board of Directors meeting and provided public comments on Pure Water Southern California.

Also on March 10th, participated in the South El Monte Operable Unit (SEMOU) and WNOU Quarterly Stakeholders meeting.

On Wednesday, March 11, 2026, attended the TVMWD Managers meeting.

On Thursday, March 12, 2026, attended the MWD-sponsored Inspection Trip of Diamond Valley Lake, and visit to Santa Rosa Plateau Ecological Reserve.

On Monday, March 16, 2026, participated in a meeting with the Responsible Agencies partners regarding Invasive Mussel Impacts on San Gabriel Infrastructure Assessment.

Later that day on the 16th, attended the USGVMWD Water Resources and Facilities Planning meeting where the discussion included an update on water supply and Golden Mussel.

On Tuesday, March 17, 2026, attended Walnut Valley Water District's ribbon-cutting celebration of their new headquarters.

Also on the 17th, participated in the recurring meeting of the Groundwater Replenishment Working Group with staff from MWD, Water Replenishment District of Southern California (WRD), the Sanitation

Districts, the County, USGVMWD, TVMWD, and SGVMWD.

Later on March 17th, attended USGVMWD Administration and Finance Committee meeting where the discussion included the proposed administrative biennial budget.

On Wednesday, March 18, 2026, attended TVMWD's Board of Directors meeting.

Also on March 18th, attended a facilities tour hosted by the San Gabriel River Water Committee.

On Thursday, March 19, 2026, met with Ms. Agatha Kotani, Principal of Business Development in Southern California for California American Water.

On Tuesday, March 24, 2026, attended the California Groundwater Coalition Quarterly Board of Directors meeting.

On Wednesday, March 25, 2026, attended a meeting hosted by the Department of Toxic Substances Control relative to SEMOU and WNOU.

Later that day on the 25th, attended the USGVMWD's Board of Directors meeting.

On Thursday, March 26, 2026, attended the SCWUA meeting that featured guest speaker, Mr. Adan Ortega, Chair, MWD Board of Directors.

On Wednesday, April 1, 2026, attended the TVMWD Board of Directors meeting.

Later that morning, attended the San Gabriel Valley COG Energy, Environment and Natural Resources Committee Meeting.

On Tuesday, April 7, 2026, attended the Los Angeles County Water Plan Nature-Based Solutions Task Force: Phase 2 Meeting.

Later that afternoon, coordinated a meeting with the California Construction and Industrial Materials Association regarding water levels and potential impacts on gravel operations.

On Wednesday, April 8, 2026, participated in a Status Conference before the Honorable Maureen Duffy-Lewis regarding the Golden Mussel issue.

That afternoon, attended the USGVMWD Board of Directors meeting that included a presentation on MWD's Preliminary Budget/Rate Impacts.

On Saturday, April 11, 2026, hosted an educational booth at the Los Angeles County Sanitation Districts Earth Day event.

On Monday, April 13, 2026, attended the SGVMWD Board of Directors meeting.

On Tuesday, April 14, 2026, virtually attended MWD's Board of Directors meeting.

Later in the afternoon on the 14th, participated in a Los Angeles County Water Plan Communications Task Force meeting.

Also on April 14th, attended the San Gabriel Valley COG Water Working Group meeting.

And lastly on the 14th, attended the USGVMWD's Administration and Finance Committee meeting where the discussion included a budget workshop on the proposed biennial budget for Fiscal Years 2026-27 and 2027-28.

On Wednesday, April 15, 2026, attended the TVMWD Board of Directors meeting.

On Thursday, April 16, 2026, participated in the Association of Water Agencies of Ventura County's

34th Annual Water Symposium, along with representatives from Antelope Valley East Kern Water Agency, Orange County Water District and Fox Canyon Groundwater Management Agency on a panel titled “The Groundwater Playbook: What Other Agencies Have Learned About Rights, Governance, and Long-Term Planning.”

Later that day, participated in the Water Quality Permitting Consortium Workshop on Groundwater Basin Salinity, Project Permitting and Salt and Nutrient Management Plans (SNMPs).

On Monday, April 20, 2026, met with Karl Seckel, MWD Board Member, regarding the importance of Pure Water Southern California to the Main Basin.

On Tuesday, April 21, 2026, attended the Committee of Nine Board of Directors meeting.

On the afternoon of April 21st, met with representatives from SGVMWD and City of Azusa regarding cyclic storage deliveries.

Following the earlier meeting, met with SGVMWD and TVMWD regarding storage opportunities.

On Wednesday, April 29, 2026, attended a San Gabriel River West Fork Working Group meeting.

On Thursday, April 30, 2026, attended Suburban Water Systems’ ribbon-cutting event for its Plant 128.

That afternoon on the 30th, participated in an ACWA Working Group meeting regarding the Golden Mussel.

On Saturday, May 2, 2026, participated in the USGVMWD WaterFest at Arcadia Park.

On Monday and Tuesday, May 4 and 5, 2026, attended the ACWA conference in Sacramento. While there, also participated in the ACWA Joint Powers Insurance Authority’s membership and the California Groundwater Coalition Board of Directors meetings.

On Monday, May 11, 2026, attended the SGVMWD Board of Directors meeting.

On Tuesday, May 12, 2026, attended the MWD Board of Directors meeting and provided public comments on the Pure Water Southern California project.

On Wednesday, May 13, 2026, attended the TVMWD’s Member Agency Managers Meeting that included a water sales update, and MWD activities.

Later that day on the 13th, attended the USGVMWD Board of Directors meeting.

On Thursday, May 14, 2026, participated in an ACWA Working Group meeting regarding the Golden Mussel.

On Monday, May 18, 2026, attended the Los Angeles County Water Resiliency Summit.

On Tuesday, May 19, 2026, and Thursday, May 21, 2026, met with representatives from the Department of Toxic Substances Control regarding the WNOU.

Also on May 1Nineth, attended the Committee of 9 Board meeting.

Later that day on the 19th, participated in the El Monte Operable Unit Stakeholder meeting.

Following the earlier meeting, attended the GWSA Executive Committee meeting.

On Wednesday, May 20, 2026, attended the Public Water Agencies Group Annual Picnic.

On Thursday, May 28, 2026, at the invitation of SCWUA, hosted a tour of the San Gabriel Valley

watershed and key locations and infrastructure related to the local water supply system.

Later that day, participated in an ACWA Working Group meeting regarding the Golden Mussel.

On Monday, June 1, 2026, attended the USGVMWD's Water Resources and Facilities Planning Committee meeting.

On Tuesday, June 2, 2026, attended the Los Angeles County Water Plan Nature-Based Solutions Task Force: Phase 2 Meeting.

Later that afternoon, attended the USGVMWD Administration and Finance Committee meeting.

On Wednesday, June 3, 2026, attended the TVMWD Board of Directors meeting.

Later that morning, attended the San Gabriel Valley COG Energy, Environment and Natural Resources Committee Meeting.

On Thursday, June 4, 2026, participated in a meeting with the Regional Water Quality Control Board regarding USGVMWD deliveries.

On Monday, June 8, 2026, attended the SGVMWD's Board of Directors meeting.

On Tuesday, June 9, 2026, the Executive Officer testified in Sacramento on behalf of SGVWA on Assembly Bill 1894 (Blanca Rubio), Fish and wildlife: aquatic invasive species: genus Caulerpa.

Also on June 9th, attended the Los Angeles County Water Plan Nature-Based Solutions Task Force: Phase 2 Meeting.

Additionally, attended the SEMOU and WNOU Stakeholders meeting.

On Wednesday, June 10, 2026, participated in TVMWD's Managers meeting.

Also on the 10th, attended the USGVMWD Producer meeting.

Later that day on the 10th, attended the USGVMWD Board of Directors meeting.

On Thursday, June 11, 2026, participated in an ACWA Working Group meeting regarding the Golden Mussel.

From Friday, June 12 through Sunday, June 14, 2026, participated in a State Water Project Tour as a guest of the USGVMWD.

On Monday, June 15, 2026, participated in a workshop, "Data Centers and Community Impact," hosted by the Linde Center for Science, Society, and Policy in collaboration with the Caltech Science Exchange and the Resnick Sustainability Institute.

On Tuesday, June 16, 2026, attended the Committee of Nine Board of Directors meeting.

On Monday, June 22, 2026, participated in a Golden Mussel Plan Partners meeting.

On Tuesday, June 23, 2026, participated in the California Groundwater Coalition Legislative Committee meeting.

On Wednesday, June 24, 2026, participated on an interview panel as part of TVMWD's recruitment process for the Government Affairs Manager position.

Also on the 24th, attended the groundbreaking ceremony for Rubio Cañon Land and Water Association's reconstruction of four reservoirs damaged in the Eaton Fire in Altadena.

Later that afternoon on the 24th, attended USGVMWD's Board of Directors meeting and participated in a presentation on the Cooperative Water Exchange.

On Thursday, June 25, 2026, attended TVMWD's Leadership Breakfast meeting.

Coordinated and Participated in Central Basin Water Association (CBWA) Meetings

On Monday, July 7, 2025, facilitated the CBWA Board Meeting.

The CBWA Legislative Committee also met earlier that same day.

On Thursday, August 7, 2025, co-coordinated and participated in the CBWA's annual Joint CBWA / West Basin Water Association Meeting, which also included the SGVWA, bringing together the three main groundwater basins to hear presentations from Jennifer Pierre (State Water Contractors) and Adan Ortega (MWD Chair) on the importance of the State Water Project and Delta Conveyance Project.

On Monday, October 6, 2025, organized and attended the CBWA Board meeting. Discussion primarily included water supply conditions in the Central Basin.

On Monday, November 3, 2025, organized and attended the CBWA Board meeting, discussing primarily routine items.

On Thursday, November 6, 2025, the CBWA Quarterly Membership meeting was held, which included a legislative and regulatory update presented by CBWA Lobbyist, Ms. Jennifer Capitolo.

On Monday, January 5, 2026, facilitated the CBWA Board Meeting.

On Monday, February 2, 2026, coordinated a meeting of the Legislative Committee where discussion included legislation on Senator Archuleta's proposal to authorize utility workers in disaster zones, data centers, and proposals on water utilities and wildfire.

On Monday, February 9, 2026, organized the CBWA Quarterly Meeting, with a presentation from Ms. Phuong Watson, Senior Engineer, Water Replenishment District. She provided a valuable and timely update on PFAS in the Central Basin.

On Monday, March 2, 2026, organized and participated in the CBWA Board of Directors Meeting.

Additionally, coordinated and participated in the CBWA Legislative Committee meeting earlier that morning.

On Monday, April 6, 2026, organized and participated in the CBWA Board of Directors Meeting.

Additionally, coordinated and participated in the CBWA Legislative Committee meeting earlier that morning.

On Monday, May 11, 2026, organized and participated in the CBWA Annual Membership meeting featuring guest speaker, Mr. Andrew Han, Project Manager, Los Angeles Department of Water & Power, who presented "Investing in a Sustainable Water Future" on the Los Angeles Groundwater Replenishment Project. Additionally, the Budget and Officers/Directors for Fiscal Year 2026-27 were adopted. (The Legislative Committee and regular Board Meeting were not held this month due to the Annual Membership Meeting.)

On Monday, June 1, 2026, organized and participated in the CBWA Board of Directors Meeting.

Additionally, coordinated and participated in the CBWA Legislative Committee meeting earlier that morning.

Organized and Participated in San Gabriel Valley Water Association (SGVWA) Meetings

On Monday, July 28, 2025, organized and participated in the SGVWA Monthly Board Meeting.

The SGVWA Legislative Committee also met earlier that same day.

On Thursday, August 7, 2025, coordinated and participated in the SGVWA's Quarterly Meeting, held jointly with the annual Joint CBWA / West Basin Water Association Meeting.

On Monday, September 22, 2025, organized and participated in the SGVWA Board and Legislative Committee meetings. The Legislative Committee started with a tour of the Valley County Water District BPOU facilities with Congressman Gil Cisneros sharing the importance of water conveyance systems in the San Gabriel Valley. At the Board meeting, discussion included end-of-session legislative status and strategies on the Golden Mussel infestation.

On Wednesday, October 1, 2025, met with Mr. Robert Ferrante, General Manager, Los Angeles County Sanitation Districts, regarding a speaking engagement at SGVWA's Annual Membership meeting on November 13, 2025.

On Wednesday, October 15, 2025, coordinated and participated in a meeting of the SGVWA's Nominating Committee.

On Monday, October 27, 2025, coordinated and participated in the SGVWA's Board Meeting. Discussion included a legislative update, as well as a report from the Nominating Committee regarding the proposed slate for 2026.

On Thursday, November 13, 2025, coordinated and participated in the SGVWA's Annual Membership Meeting, featuring a discussion on "Everything Pure Water: A Joint Regional Effort" presented by Mr. Robert Ferrante, General Manager, Los Angeles County Sanitation Districts, and Mr. Deven Upadhyay, General Manager, MWD.

On Monday, January 26, 2026, organized and participated in the SGVWA Monthly Board Meeting.

The SGVWA Legislative Committee also met earlier that same day.

On Thursday, February 12, 2026, organized and participated in the SGVWA Quarterly Meeting. The program featured keynote speakers: Mr. Youchen (Tim) Chao, Assistant Division Manager, California Department of Water Resources (DWR), and Mr. Jerry Snow, Environmental Manager II, DWR, who provided an overview of Golden Mussel management in the State Water Project.

On Monday, March 23, 2026, organized and participated in the SGVWA Monthly Board Meeting.

Additionally, participated in the SGVWA Legislative Committee meeting held earlier that day.

On Monday, April 27, 2026, organized and participated in the SGVWA Monthly Board Meeting.

Additionally, participated in the SGVWA Legislative Committee meeting held earlier that day.

On Thursday, May 21, 2026, organized and participated in the SGVWA Quarterly Membership meeting, featuring Mr. Randy Schoellerman, Executive Director, SGBWQA, who provided an update on federal funding. (The Legislative Committee and regular Board Meeting were not held this month due to the Quarterly Membership Meeting.)

Coordinated, Participated, Organized and Hosted San Gabriel Valley Protective Association (SGVPA) Meetings

On Monday, March 9, 2026, coordinated and participated in the SGVPA Executive Committee. Items of discussion included the annual budget and appointment of Officers and Committee Members.

On Monday, March 16, 2026, coordinated and hosted the SGVPA Distribution Committee meeting, where the discussion included information on local rainfall and runoff.

On Monday, April 20, 2026, organized and hosted the SGVPA Annual and Organizational meetings. These meetings included information on local rainfall and runoff, along with the adoption of the annual budget.

Participated in the Greater Los Angeles County Integrated Regional Water Management (GLAC IRWM) Meetings

On Wednesday, July 23, 2025, attended the Greater Los Angeles County IRWM Leadership Committee meeting. The focus of the meeting was updating the IRWM platform in consideration of other County measures and regional funding opportunities.

On Thursday, October 16, 2025, attended the Upper San Gabriel & Rio Hondo Integrated Regional Water Management (IRWM) meeting.

On Thursday, November 20, 2025, attended the Upper San Gabriel & Rio Hondo IRWM meeting.

On Wednesday, November 26, 2025, participated in the GLAC IRWM Committee meeting.

On Monday, March 2, 2026, participated in a meeting with Los Angeles County representatives on the status of IRWM.

On Wednesday, March 25, 2026, participated in the GLAC IRWM Leadership Committee meeting.

On Wednesday, May 1, 2026, participated in the GLAC and RioHondo IRWM Leadership Committee meeting.

Participated in BPOU Project Agreement and Other Meetings

On Tuesday, July 22, 2025, attended the BPOU strategy meeting discussing the upcoming renewal of the project agreement.

On Tuesday and Wednesday, August 12-13, 2025, coordinated and participated in the BPOU Budget meetings.

On Tuesday, August 26, 2025, participated in the BPOU Project Renewal Strategy Group meeting.

On Thursday, September 11, 2025, participated in the quarterly BPOU project committee meeting.

On Tuesday, September 23, 2025, coordinated the BPOU Project Renewal Strategy group meeting.

On Monday, October 20, 2025, attended the BPOU strategy meeting to discuss remedy modeling that included representatives from the Environmental Protection Agency.

On Tuesday, October 28, 2025, participated in the BPOU Project Agreement Strategy Meeting.

On Monday, November 10, 2025, coordinated an introductory meeting with legal representatives for the Water Entities, Watermaster and SGBWQA.

On Monday, November 17, 2025, coordinated and participated in a BPOU Water Entities Strategy meeting with representatives from the Environmental Protection Agency.

On Tuesday, November 25, 2025, participated in the BPOU Project Agreement Renewal meeting.

On Thursday, December 11, 2025, coordinated an introductory meeting with the Cooperating Respondents regarding the 2027 BPOU Project Renewal Agreement.

Later that morning on the 11th, participated in the regular BPOU Project Meeting.

On Tuesday, December 16, 2025, coordinated a BPOU Water Entities Strategy meeting at Valley County Water District and held a follow-up call with Cooperating Respondent representatives Craig Keating and Scott Goulart.

On Thursday, December 18, 2025, met with Mr. Wayne Praskins, Project Manager, Environmental Protection Agency, regarding the BPOU Project agreement renewal expectations.

On Wednesday, January 14, 2026, coordinated a meeting with the Water Entities related to the BPOU Project Renewal Agreement.

On Tuesday, January 20, 2026, coordinated a meeting with the Cooperating Respondents and Water Entities regarding the 2027 BPOU Project Agreement.

On Wednesday, February 18, 2026, coordinated a meeting with the Water Entities regarding the 2027 BPOU Project Agreement deliverables and tasks.

On Tuesday, February 24, 2026, coordinated a meeting with the Cooperating Respondents and Water Entities regarding the 2027 BPOU Project Agreement Renewal.

On Wednesday, March 4, 2026, coordinated a meeting with the Water Entities regarding the 2027 BPOU Project Agreement deliverables and tasks.

On Monday, March 9, 2026, participated in a meeting regarding BPOU insurance renewals.

On Monday, March 30, 2026, facilitated a meeting with the Cooperating Respondents and Water Entities regarding the 2027 BPOU Project Agreement Renewal.

On Tuesday, April 14, 2026, coordinated a meeting with the Water Entities and Cooperating Respondents regarding the 2027 BPOU Project Agreement deliverables and tasks.

On Monday, April 27, 2026, coordinated a meeting with the Water Entities in preparation for the April 28, 2026, negotiations meeting.

On Tuesday, April 28, 2026, facilitated a meeting with the Cooperating Respondents and Water Entities regarding the 2027 BPOU Project Agreement Renewal.

On Tuesday, May 12, 2026, coordinated a meeting with the Water Entities and Cooperating Respondents regarding the 2027 BPOU Project Agreement deliverables and tasks.

On Monday, May 18, 2026, coordinated a meeting with the Water Entities regarding the 2027 BPOU Project Agreement deliverables and tasks.

On Tuesday, May 26, 2026, coordinated a meeting with the Water Entities and Cooperating Respondents regarding the 2027 BPOU Project Agreement deliverables and tasks.

On Tuesday, June 9, 2026, coordinated a meeting with the Water Entities and Cooperating Respondents regarding the 2027 BPOU Project Agreement deliverables and tasks.

On Thursday, June 11, 2026, coordinated a BPOU Project Committee meeting.

On Tuesday, June 23, 2026, coordinated a meeting with the Water Entities and Cooperating Respondents regarding the 2027 BPOU Project Agreement deliverables and tasks.

Participated in Safe Clean Water Program – WASC (Rio Hondo, Upper San Gabriel)

On Tuesday, July 15, 2025, attended the County's Safe Clean Water Program, Rio Hondo Watershed Area Steering Committee (WASC) Meeting, where the group discussed recommendations for the appointment of the region's Watershed Coordinator.

On Tuesday, August 19, 2025, attended the Rio Hondo WASC meeting as part of Los Angeles County's Safe Clean Water LA program. The meeting included a vote for Watershed Area Representative.

On Thursday, August 28, 2025, attended the Upper San Gabriel River WASC meeting that included the appointment of a new Committee Chair and Vice Chair.

On Tuesday, October 21, 2025, attended the Rio Hondo WASC meeting as part of the Safe Clean Water Program.

On Thursday, October 23, 2025, attended the Upper San Gabriel River WASC meeting as part of the Safe Clean Water Program.

On Tuesday, November 18, 2025, attended the Rio Hondo WASC meeting as part of the Safe Clean Water Program.

On Thursday, January 22, 2026, attended the Upper San Gabriel WASC meeting as part of Los Angeles County's Safe Clean Water LA program.

On Tuesday, February 17, 2026, participated in a meeting of the Safe Clean Water Program's Rio Hondo WASC.

On Thursday, February 26, 2026, participated in a meeting of the Safe Clean Water Program's Upper San Gabriel WASC.

On Thursday, March 26, 2026, participated in a meeting of the Safe Clean Water LA Program's Upper San Gabriel River WASC.

On Tuesday, April 21, 2026, attended the Rio Hondo WASC meeting as part of the Safe Clean Water Program.

On Thursday, April 23, 2026, attended the Upper San Gabriel WASC meeting.

On Tuesday, May 19, 2026, participated in the Rio Hondo WASC meeting as part of Los Angeles County's Safe Clean Water Program.

On Thursday, May 28, 2026, attended the Upper San Gabriel WASC meeting.

On Thursday, June 25, 2026, participated in the Rio Hondo WASC meeting as part of Los Angeles County's Safe Clean Water Program.

APPENDIX B

MAIN SAN GABRIEL BASIN WATERMASTER OVERVIEW

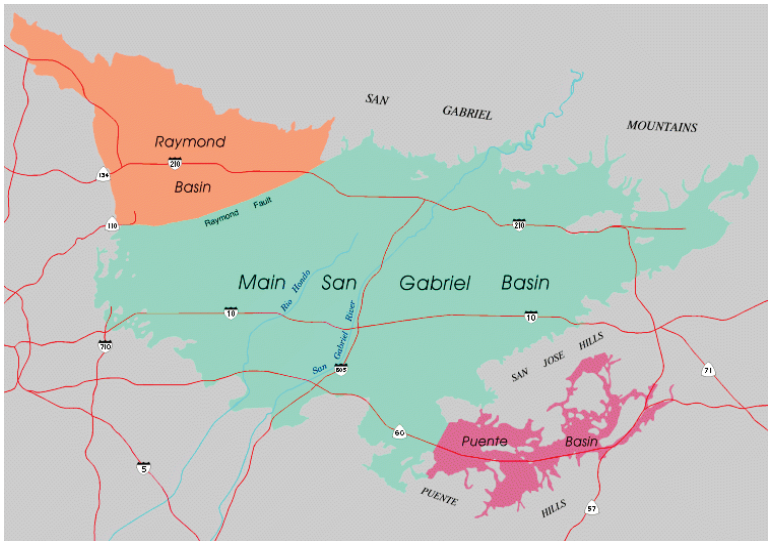

APPENDIX B
MAIN SAN GABRIEL BASIN OVERVIEW

INTRODUCTION

The Main San Gabriel Basin is situated in the southeasterly portion of Los Angeles County, bounded on the north by the San Gabriel Mountains, on the northwest by Raymond Basin, on the southeast by Puente Basin, and on the south by Central Basin.

FORMATION AND PURPOSE OF WATERMASTER

The Main San Gabriel Basin groundwater and surface water rights were adjudicated in 1973, and the Court established the Main San Gabriel Basin Watermaster (Watermaster) to manage the water supply and water quality of the Main San Gabriel Basin. The Judgment was entered January 4, 1973, and from its inception, water quality has been one of Watermaster's responsibilities. Section 26m of the original Judgment (amended Section 34m) states, "Water quality in the Basin shall be a concern of Watermaster and all reasonable steps shall be taken to assist and encourage appropriate regulatory agencies to enforce reasonable water quality regulations affecting the Basin…"

OVERVIEW

County: Los Angeles (southeasterly portion).

Area: 107,000 acres/167 square miles.

Population: 1,216,931 (2020 data).

CASGEM RANK: Very Low (Pursuant to document entitled "2019 SGMA Basin Prioritization Process and Results").

Watermaster: Main San Gabriel Basin Watermaster.

Members: Nine-person board appointed by LA County Superior Court; six elected by water Producers, three nominated by municipal water districts.

Court Case: Upper San Gabriel Valley Municipal Water District, Plaintiff, vs. City of Alhambra, et al., Defendants, Superior Court of the State of California (Case No. 924128).

BASIN LOCATION AND DESCRIPTION:

The Main San Gabriel Basin occupies most of the San Gabriel Valley. It encompasses about 107,000 acres, and the amount of groundwater in storage was 8.6 million acre-feet when the groundwater elevation at the Baldwin Park Key Well was 316 feet on September 30, 1944. In general, one foot of groundwater elevation change is equivalent to about 8,000 acre-feet in storage. Hydrogeologically, the San Gabriel groundwater Basin is divided between three adjudicated sub-basins: Main Basin, Puente Basin, and portions of Six Basins area.

In addition, there is the Spadra sub-basin, which is not adjudicated. Collectively, the Main San Gabriel Basin and Puente Basin are bounded on the north by the San Gabriel Mountains, on the east by the San Jose Hills, on the south by the Puente Hills, and on the west by the Raymond Fault. The San Gabriel River and Rio Hondo, a distributary of the San Gabriel River, drain the San Gabriel River watershed. The Puente Basin

is in the southeast and is a tributary of the Main Basin. The Six Basins area is located in the northeast and a portion is tributary of the Main Basin. Each is adjudicated and managed separately. The aquifers are located inland (saltwater intrusion is not a risk) and are unconfined. In the San Gabriel Valley, average precipitation over the past 100 years is approximately 18.5 inches, but the average over the past ten years is only 17.2 inches.

The major sources of natural recharge to the Main San Gabriel Basin are rainfall infiltration on the valley floor and runoff from the nearby mountains. The Main San Gabriel Basin is the first of a series of basins (including Puente, Central, and West Coast Basins) to receive the benefit of mountain runoff, and the Basin interacts hydrogeologically and institutionally with these adjoining basins. In the mid-1800s, agriculture and ranching were the Basin's primary economic activities. The Main San Gabriel Basin's current land use is primarily urban.

Total production over the past ten years, including groundwater and treated local surface water, has remained low and averaging about 189,000 acre-feet.. Fiscal year and 2025-26 production has slightly increased but remains below the 10-year average, about 178,800 acre-feet. The majority of pumping is conducted by municipal water purveyors, and a lesser amount of production is conducted by rock and gravel companies. Most communities depend almost entirely on Main San Gabriel Basin groundwater for their water supply, and also benefit from indirect access to untreated imported water, which is used to replenish the groundwater Basin.

NEED FOR ADJUDICATION

Beginning in the 1940s, the San Gabriel Valley experienced rapid urbanization as well as a decrease in recharged wastewater due to an increase in sewage exports. This led to increased demand for water drawn from the Main San Gabriel Basin. By the 1950s, the Main San Gabriel Basin was in a state of overdraft and parties downstream from the Main San Gabriel Basin, including agricultural and urban water purveyors in the Central and West Coast Basins, became concerned. These downstream users (primarily the municipal providers for Compton, Long Beach, and the Central Basin) who relied on the San Gabriel River system for their natural water supply as it flowed through the Whittier Narrows, initiated a legal action (the Long Beach Judgment of 1965). This resulted in a court decision requiring Main San Gabriel Basin water users to guarantee a defined and calculated annual amount of water to downstream basins. For several years, the Upper San Gabriel Valley Municipal Water District (USGVMWD) administered and took responsibility for the Main San Gabriel Basin's obligations to these downstream groundwater basin water users. In 1968, the Main San Gabriel Basin municipal water producers requested that the Upper San Gabriel Valley Municipal Water District file a complaint to adjudicate water rights in the Main San Gabriel Basin and bring Main San Gabriel Basin producers under control of one governing body. This complaint, initiated by municipal users and filed by the Upper San Gabriel Valley Municipal Water District, became the basis for the 1973 Main San Gabriel Basin Judgment. Rather than adjudicate based on mutual prescription, as was done in Central and West Coast Basins, municipal users in the San Gabriel Valley chose to negotiate in a "friendly" adjudication. The water association commissioned a consultant and legal counsel to develop the negotiated settlement and management plan. This became the stipulated Judgment, which was accepted by the Court in 1973.

JUDGMENT AND AMENDMENTS

Type of action: Stipulated Judgment and lawsuit.

Adjudication initiated: 1968

Adjudication finalized: 1973

Revisions or amendments: 1989, 1991, 1992, 2012

Other significant dates: 1965 Long Beach Judgment and 1972 Puente Narrows Agreement.

Costs: $4,000,000 to $5,000,000 per year.

DECREE SUMMARY:

The Main San Gabriel Judgment defined water rights for about 190 original parties, created the Main San Gabriel Basin Watermaster as the governing body, and described a Physical Solution for water management. The Physical Solution provides for Watermaster control of Basin management and flexibility in

initiating cooperative agreements, regulating and controlling pumping, purchasing replacement water, and determining the natural and operational safe yields (see below). The Judgment allows for overproduction of rights, but overproduction incurs a Replacement Water Assessment. Subsequent amendments clarified and extended Watermaster's role. Both groundwater and surface water rights in the Main San Gabriel Basin were adjudicated under five classes of water rights. 1) Groundwater rights based on mutual prescription (see Raymond Basin) whiich comprised about 95 percent of annual water rights for direct use. Each pumper's share was a percentage of the total adjudicated rights. 2) Base annual diversion rights, which are surface rights held by parties not owning groundwater (prescriptive) pumping rights. 3) Integrated production rights held by Producers with combined surface and groundwater rights, which allow for greater diversions and use of less groundwater in wet years, and then carrying over unused prescriptive rights to the following year. 4) Special rights that are allocated to MWD for its dam and reservoir and to LA County Flood Control District for its reservoir. 5) Non-consumptive user rights for parties operating spreading facilities. Pumpers whose production exceeds their water rights pay an assessment to finance the purchase of replenishment water. The Judgment placed injunctions against unauthorized production, non-consumptive uses (not including spreading), unauthorized recharge, and exporting native water from the Main San Gabriel Basin.

JUDGMENT AMENDMENT SUMMARY:

In 1991, Watermaster was given authority to allow recharge of up to 30,000 acre-feet per year of recycled water as supplemental water and was also given authority to control pumping for water quality improvement purposes and enter into agreements with the EPA to facilitate groundwater cleanup. In 2012, Watermaster was given authority to develop and levy a Water Resource Development Assessment (RDA) to bring additional untreated imported water into the Main San Gabriel Basin. Initially, Watermaster levied an RDA (referred to as RDA I) to create an emergency reserve of untreated imported water stored in the Main San Gabriel Basin to be used in the event untreated imported water was not available to satisfy a Replacement Water obligation. As a result of the prolonged drought, Watermaster and the Producers cooperatively developed the RDA II program, which generates revenue to purchase untreated imported water to supplement the lack of stormwater replenishment as the result of continued drought conditions. The RDA II program is also complementary to the groundwater basin management mandate included in the "Sustainable Groundwater Management Act" (SGMA).

Two other judgments were acknowledged in the Main Basin adjudication. **The Long Beach Judgment,** rendered by the Superior Court in 1965, guarantees Central and West Coast Basins an average annual water supply of about 98,000 acre-feet per year through the Whittier Narrows. **The Puente Narrows Agreement** of 1972 between Puente Basin Water Agency and Upper San Gabriel Valley Municipal Water District calculates and governs subsurface outflow from Puente Basin to the Main San Gabriel Basin. This agreement calls for an average Base Underflow of 580 acre-feet per year from Puente Basin to the Main San Gabriel Basin. The Main San Gabriel BasinWatermaster adheres to both rulings.

WATER USERS

Stipulated Users:

Stipulated users originally included about 190 parties of which about 40 were municipal purveyors. Designated parties to the Judgment included the Upper San Gabriel ValleyMunicipal Water District, the Three Valleys Municipal Water District, the San Gabriel Valley Municipal Water District, about 40 other public and investor-owned water supply agencies, 15 industrial customers, and eight agricultural and golf course pumpers.

Current Users:

About forty-five private parties or companies pump directly. A number of parties have rights to divert surface flows.

MANAGEMENT STRUCTURE

Main San Gabriel Basin Watermaster is a nine-person board, appointed by Los Angeles County Superior Court, which manages and controls the withdrawal of groundwater and surface water, and coordinates water deliveries and recharge. The Watermaster Board is comprised of six individuals elected by water Producers and three by water districts (two by Upper San Gabriel Valley Municipal Water District and one by the San Gabriel Valley Municipal Water District). Each member serves a one-year term. Several advisory committees have been established to assist the Watermaster Board. Its membership includes Watermaster board

members and may also include advisory committee members who are not Watermaster board members. Watermaster has a staff and engages consultants for special projects.

Watermaster's responsibilities include: managing and controlling the withdrawal and replenishment of water supplies in the Basin; determining the Operating Safe Yield annually; raising replenishment revenue by means of assessments, and acquiring and spreading untreated imported water for groundwater replenishment; raising revenue by means of assessments and acquiring and spreading untreated imported water to supplement the lack of stormwater runoff; coordinating local involvement in efforts to preserve and restore the quality of the Basin's groundwater; assisting and encouraging regulatory agencies to enforce water quality regulations in the Basin; collecting production, water quality, and other relevant data from Producers; and preparing an annual report.

The Upper San Gabriel Valley Municipal Water District, Three Valleys Municipal Water District, and San Gabriel Valley Municipal Water District deliver supplemental State Water Project (SWP) water to the Basin. The County of Los Angeles Department of Public Works (LACDPW) plays a role in ensuring groundwater Basin replenishment from local stormwater runoff is coordinated with replenishment of supplemental SWP water. The San Gabriel Basin Water Quality Authority obtains some funding for the Main San Gabriel Basin's cleanup activities. The San Gabriel River Watermaster calculates the Main San Gabriel Basin's credits and debits pursuant to the terms of the Long Beach Judgment.

MANAGEMENT STRATEGIES

Main San Gabriel Basin demand is satisfied about 85 percent from local groundwater, 10 percent from treated imported water, and 5 percent from other local supplies (recycled water and local surface water diversions). In addition, an average of about 40,000 acre-feet per year of untreated imported water historically has been delivered for Main San Gabriel Basin replenishment (Replacement Water). Also, during fiscal year 2016-17, Watermaster implemented the RDA program to deliver untreated imported water to the Main San Gabriel Basin to supplement stormwater runoff replenishment. Watermaster collects funds from the RDA assessment to purchase RDA water. Under the RDA program, about 26,100 acre-feet of RDA water was purchased from MWD's Cyclic Storage Letter Agreement during fiscal year 2025-26. The typical Main San Gabriel Basin operating range for water levels is between 200 and 250 feet MSL above mean sea level (MSL).

Since 2011–12, Watermaster has brought in an additional 250,900 acre-feet of RDA water and 775,900 acre-feet of imported untreated water, representing about 128 feet at the Key Well.

There are about 17 spreading basins in the Main San Gabriel Basin, covering more than 1,100 acres, which are operated by LACDPW or other agencies capable of capturing storm-water runoff from adjacent canyons and/or imported water. The spreading capacity of existing facilities is more than 600,000 acre-feet per year.

In 1983, the agencies in the San Gabriel River Watershed formed the Groundwater Replenishment Committee. They agreed to coordinate deliveries of local, recycled, and imported water for groundwater replenishment, and identify future needs and potential replenishment facilities.

Watermaster, municipal water districts, and Producers have various cyclic storage agreements in which untreated imported water is stored in the Main San Gabriel Basin and extracted when imported water supplies are short. Imported water is credited to these cyclic storage accounts.

Metropolitan also delivers replenishment water to the Main San Gabriel Basin, through sales to Three Valleys Municipal Water District and Upper San Gabriel Valley Municipal Water District. During calendar year 2017, 2019, and 2024, Metropolitan entered into separate agreements to deliver untreated imported water into the Main Basin, with payment arrangements for the water occurring in equal amounts over five consecutive years for 2017 and 2019 and ten consecutive years for 2024 and 2025.

MONITORING AND REPORTING

There are about 250 wells in the Main San Gabriel Basin, 200 of which are active. There are about 20 non-municipal wells. Watermaster monitors most of these wells for water quality parameters. In addition, the Basin-wide Groundwater Elevation Monitoring Program (BGWEMP) is a network of wells in the Main San Gabriel Basin that are regularly measured by the Watermaster on a permanent basis. The program is

designed to facilitate coordination of existing water-level monitoring done by agencies. In addition, each adjudicated party is obligated to file a quarterly report with the Watermaster showing the total pumping and diversion amounts.

SAFE YIELD

Groundwater storage capacity was determined by the Department of Water Resources (DWR) in 1975 to be 10,438,000 acre-feet. The Main San Gabriel Basin Judgment determined the Natural Safe Yield of Main Basin to be 152,700 acre-feet on the basis of 1967 conditions but is close to 185,000 acre-feet based on 2016 conditions. Watermaster annually determines the Operating Safe Yield (OSY) as the amount of groundwater that can be pumped in a fiscal year without replacement water assessments. The main factors in making this determination are rainfall, runoff amounts, and groundwater levels. In 2005-06 the OSY was 240,000 acre-feet, and in 2025-26 the OSY was 160,000 acre-feet. Producers may pump in excess of annual pumping rights but must pay for supplemental untreated imported water to replenish the Basin. Any entity that wishes to spread or store supplemental water within the Main San Gabriel Basin for later recovery must have a cyclic storage agreement with the Watermaster. These agreements typically have five-year or ten-year terms.

GROUNDWATER PUMPING AND OVERDRAFT

In 1944, water stored in the Main San Gabriel Basin was approximately 8,600,000 acre-feet and had decreased to 7,900,000 acre-feet by 1960. The Main San Gabriel Basin had been considered over drafted since 1953, which prompted the Main Basin adjudication. Since establishment of Main San Gabriel Basin Watermaster, groundwater recharge (local and imported water) in the valley has averaged about 150,000 acre-feet per year. As part of the Judgment, Watermaster recharges replacement water to maintain the water level at the Baldwin Park Key Well above elevation 200 feet. The highest operational groundwater elevation at the Key Well since the Judgment occurred in 1983 was 294 feet. In 2018, the groundwater elevation at the Key Well was 169 feet, which represents a historic low. Watermaster established the OSY for 2025-26 of 160,000 acre-feet, while the annual pumping production in 2025-26 was approximately 178,800 acre-feet. Consequently, the Replacement Water obligation including withdrawal from Producer cyclic storage, was about 15,000 acre-feet.

WATER QUALITY ISSUES

Four areas of the San Gabriel Valley Groundwater Basin are Superfund Sites. Contaminants such as trichloroethylene, perchloroethylene, carbon tetrachloride, perchlorate, N- nNitrosodimethylamine, and 1, 4-dioxane impact Whittier Narrows, Puente Basin, Baldwin Park and El Monte areas. As an example, a current project of the Watermaster (along with six other water entities) is to clean up the Baldwin Park Operable Unit. As a result of the negotiated agreement, parties have agreed to pay tens of millions of dollars towards research, cost recovery, and treatment plant construction. Those facilities have operated for over 17 years and continue to operate.

DROUGHT

Watermaster undertakes many initiatives to address water shortages. These include:

1. Maintaining a low Operating Safe Yield (OSY).
2. Establishing a reliability storage program with a target reserve of 100,000 acre-feet of untreated imported water (RDA I).
3. Implementing a stormwater augmentation program with a target delivery of 40,000 acre-feet per year of untreated imported water for general Basin benefit (RDA II).
4. Implementing a new assessment to pay for these two programs.
5. Collaborating on the Metropolitan Water District (MWD) Regional Recycled Water Program, which is planned to deliver large amounts of highly treated recycled water into the Basin to supplement imported supplies and decreased local runoff in dry years.
6. Looking into imported Colorado River water on a limited basis for additional supply; and
7. Expanding retail conservation outreach.

The Regional Recycled Water Program is expected to bring long-term water balance to the Basin.

PRODUCTION AND REPLENISHMENT FOR 2025-26

Management efforts are being made to ramp down pumping, and 2025-26 groundwater production was approximately 178,800 acre-feet. This was higher than the OSY for 2025-26 at 160,000 acre- feet. After considering the use of carry-over rights for some of the production, about 15,000 acre-feet will need to be delivered as untreated imported water due to over production (a portion of which will be deducted from Producers cyclic storage accounts as a pre-delivery of Replacement Water).

ADJUDICATION EFFECTIVENESS

The groundwater level in the Baldwin Park Key Well is used by Watermaster to monitor changes in groundwater supply for the Basin. The water level in this well fluctuated over 100 feet in elevation over the last 35 years from a high in 1983 to a low in 2018. Nonetheless, over the four decades between its formation in 1972 and the historic extreme drought that began in 2011, Watermaster succeeded in balancing Basin supplies–with the Key Well level starting and ending that 40-year period essentially unchanged.

Over the past decade, however, winters have generally been drier. With very low local water supplies available during the historic drought the Key well level began falling. Watermaster undertook extensive new management actions to respond to the drought as described above under “Drought” above. Nonetheless, in 2018 the groundwater elevation at the well was 169 feet, which represents a historic low.

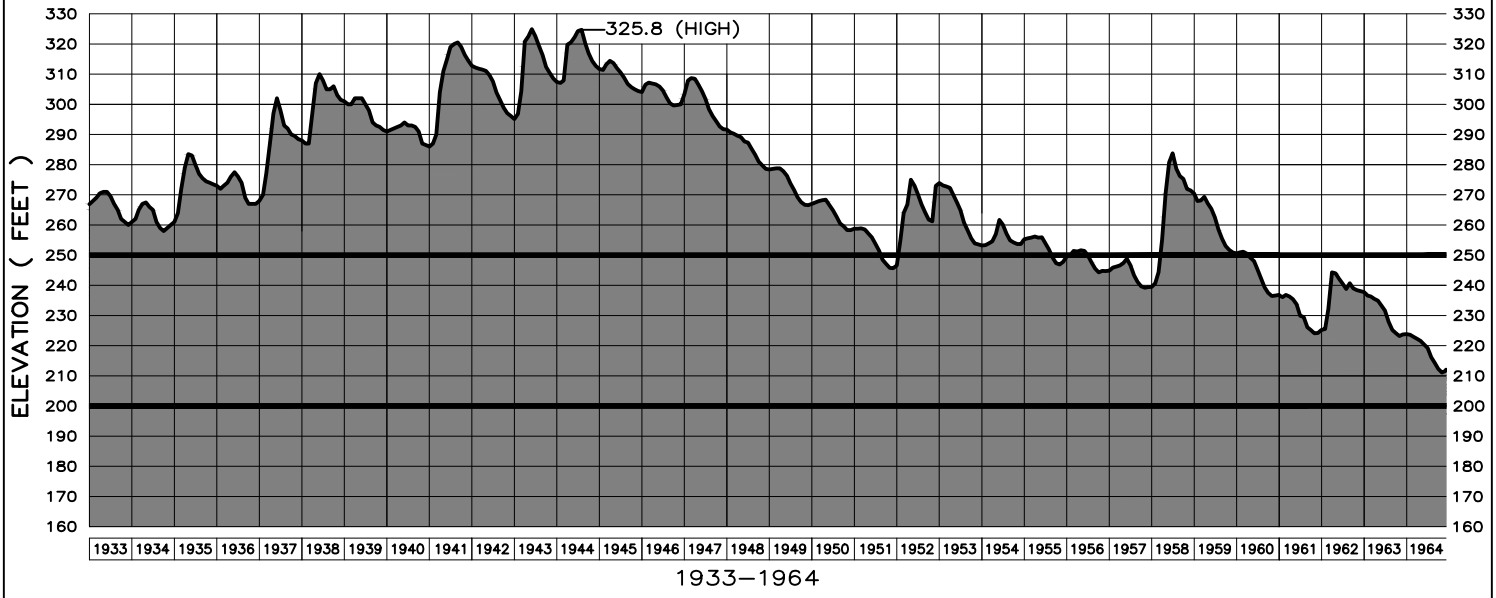

Consequently, Watermaster implemented a series of actions described above to ensure reliable water supplies and to maintain Basin groundwater levels, which was about 260 feet above mean sea level as of June 30, 2026, and are above the operating guidelines for the Key Well, due to above average rainfall during fiscal year 2025-26. Without Watermaster implemented actions, which includes Cyclic Storage and RDA, the Key Well would have fallen to about 200 feet.

Overall, the management structure has been effective in its ability to work collaboratively with overlapping agencies and basins (e.g., through the Long Beach Judgment and through joining regional and statewide drought and water supply programs).

PUENTE NARROWS WATERMASTER REPORT

April 22, 2026

Main San Gabriel Basin Watermaster
725 N. Azusa Avenue
Azusa, CA 91702

RE: Puente Narrows Underflow, Fiscal Year 2025-26

Ladies and Gentlemen:

Pursuant to the Judgment in Upper San Gabriel Valley Municipal Water District v. City of Alhambra, et al. and its Exhibit J, Puente Narrows Agreement, the subsurface flow passing from Puente Basin to the Main San Gabriel Basin was determined for fiscal year 2025-26. This determination of subsurface flow was made in accordance with Appendix C, Engineering Criteria, to Exhibit J of the Judgment and consisted of measuring the water levels at the two key wells.

The field measurements of the water levels at the upstream well, 2S/10W-9Q, and downstream well, 2S/10W-8E3, for Fall 2025 were collected on October 9, 2025 by Mr. Tuan Nguyen of Stetson Engineers Inc. representing Upper San Gabriel Valley Municipal Water District and Mr. Charlie Devine of Civiltec Engineering Inc. representing Puente Basin Water Agency. The field measurements of the water levels at the upstream well, 2S/10W-9Q, and downstream well, 2S/10W-8E3, for Spring 2026 were collected on April 2, 2026 by Mr. Tuan Nguyen of Stetson Engineers Inc. representing Upper San Gabriel Valley Municipal Water District and Mr. Charlie Devine of Civiltec Engineering Inc. representing Puente Basin Water Agency. Based on the Fall 2025 and Spring 2026 static water levels at the key wells, the subsurface flow was determined to be 835 acre-feet for fiscal year 2025-26, as shown on Table 1.

Field inspections of the concrete-lined San Jose Creek channel were made concurrently with the field water level measurements and indicated no apparent withdrawal of flow in the San Jose Creek channel from the boundary of Spadra Basin with Puente Basin and downstream to Puente Narrows.

The Puente Narrows Agreement requires that a perpetual accounting of the subsurface flow through Puente Narrows be maintained. Presented in Table 2 is the accounting to date, showing the Accumulated Base Underflow (at 580 acre-feet per year in accordance with Paragraph 8 of the Agreement), the Annual and Accumulated Subsurface Flow to date under the Agreement, the Accumulated Credit or Debit of Puente Agency and the Adjusted Accumulated Credit or Debit of Puente Agency (from Table 3).

By Agreement dated November 30, 1989, Puente Basin Water Agency and Upper San Gabriel Valley Municipal Water District agreed that groundwater extracted from Puente Basin that is treated and discharged to the lined channel, and then percolated in the Main Basin as part of Carrier Corporation's cleanup program, which is required by the Regional Water Quality Control Board, shall be credited to

Puente Agency as subsurface outflow from Puente Basin. Evaporation losses and unusable surface outflow to the ocean are deducted from such groundwater extraction from Puente Basin. As shown on Table 3, Column 6, since fiscal-year 2007-08, Carrier stopped discharging this treated water and the water is being beneficially used in the Puente Basin.

Table 3 shows the Groundwater Extraction for Cleanup Purposes, Deliveries to Rowland Water District, Discharge to Sanitary Sewer, Total Evaporation Losses, Unusable Outflow to Ocean, Annual Cleanup Extraction Credit, accumulated Annual Cleanup Extraction Credit, Accumulated Credit or Debit of Puente Agency (from Table 2), and the Adjusted Accumulated Credit or Debit of Puente Agency.

Respectfully Submitted,

PUENTE NARROWS WATERMASTER

*Agreement Re Determination of Impact of "Cleanup" Production by Carrier Corporation Upon "Subsurface Outflow" Under "Puente Narrows Agreement," November 30, 1989.

Note: Fiscal year 2025-26 adjustment to subsurface flow was not made due to incomplete data. The adjustment will be included in the Spring 2026 measurements.

1/ Sum of Replenishment Water, Replacement Water Surface Delivery, USG-5 Exchange Replacement Direct Deliveries, M & I Water, Cyclic Storage Account Deliveries on pages D-2, D-3 and D-4, plus Deliveries to Cyclic Storage on Page D-5.
2/ Includes 12,300.70 acre-feet of Morris Dam Water in 1977-78 and 24,000.00 acre-feet in 1978-79.
3/ Includes 12,756.00 acre-feet of RDA water and 14,384.31 acre-feet of Puente Basin Water Agency stored water.
4/ Includes 12,756.00 acre-feet of RDA water and 12,158.36 acre-feet of Puente Basin Water Agency stored water.
5/ Includes 12,756.00 acre-feet of RDA water and 10,677.32 acre-feet of Puente Basin Water Agency stored water.
6/ Includes 12,756.00 acre-feet of RDA water and 9,565.68 acre-feet of Puente Basin Water Agency stored water.
7/ Includes 12,756.00 acre-feet of RDA water and 9,060.80 acre-feet of Puente Basin Water Agency stored water.
8/ Includes 12,756.00 acre-feet of RDA water and 21.066.32 acre-feet of Puente Basin Water Agency stored water.
9/ Includes 12,756.00 acre-feet of RDA water and 20,876.43 acre-feet of Puente Basin Water Agency stored water.
10/ Includes 12,756.00 acre-feet of RDA water and 20,416.77 acre-feet of Puente Basin Water Agency stored water.
11/ Includes 12,756.00 acre-feet of RDA water and 21,472.33 acre-feet of Puente Basin Water Agency stored water.
12/ Includes 12,756.00 acre-feet of RDA water and 21,947.4 acre-feet of Puente Basin Water Agency stored water.
Note: The minimum and maximum values are bolded.

1/ Delivered as Replacement Water by Upper San Gabriel Valley Municipal Water District.
2/ Includes 12,300.70 acre-feet of Morris Dam water in 1977-78 and 24,000.00 acre-feet in 1978-79.
3/ Includes 1,002.40 acre-feet of In-Lieu Replenishment Water.
4/ Actual delivery of 3,214.00 reduced by 735.90 acre-feet which was transferred to Producer Cyclic Storage Deliveries.
5/ Includes transfer of 15,000 acre-feet from Three Valleys Cyclic Storage Account.
6/ Actual delivery of 3,224.10 reduced by 10.10 acre-feet which was transferred to Producer Cyclic Storage Deliveries.
7/ Includes direct deliveries to Azusa Valley Water Company of 2,290 AF through San Gabriel District's pipeline.
8/ Transfer of 5,000 acre-feet from San Gabriel District's Cyclic Storage Account to Upper District/MWD's Cyclic Storage Account
9/ Includes reduction of 1,000 acre-feet which was delivered to Canyon Basin on behalf of Three Valleys District.
10/ Includes 359.54 acre-feet of WM Replacement Water Surcharge

1/ Three Valleys District delivered and transferred to San Gabriel District's Cylcic Storage Account.
2/ Includes transfer of 15,000.00 acre-feet to Upper District Cyclic Storage.
3/ Includes 11,689.3 acre-feet delivered on behalf of Upper District to Suburban Water System's Upper District Producer Cyclic Storage.
4/ Includes 479.00 acre-feet of Watermaster's pre-purchases for Replacement Water.
5/ Includes 1,000 acre-feet delivered to Canyon Basin by Upper District on behalf of Three Valleys District.
6/ Transferred to Puente Basin Water Agency.
7/ Includes 90.07 acre-feet of WM Replacement Water Surcharge
8/ Includes 174.65 acre-feet of WM Replacement Water Surcharge
9/ Includes 600 acre-feet transferred to Puente Basin Water Agency.
10/ Includes Replacement Water Surcharge, RDA and Producer Cyclic Storage

1/ Includes 735.90 acre-feet transferred from USG-5 Exchange Replacement.
2/ Includes 10.10 acre-feet transferred from USG-5 Exchange Replacement
3/ Delivered by San Gabriel Valley District on behalf of Upper District and Three Valleys District producers.
4/ Upper District delivered 1,931.00 AF on behalf of Three Valleys District producers and 1,517.37 AF on behalf of San Gabriel District producers
5/ San Gabriel District delivered 98.24 AF on behalf of Three Valley District producers.
6/ Includes 11,689.30 acre-feet delivered by Three Valleys District on behalf of Upper District producers.
7/ Upper District Producer pre-ordered 2,676 acre-feet of Cyclic Storage from Upper District. Pre-order applied to calculated 2013-14 Replacement Water Obligation.
8/ San Gabriel District Producer pre-ordered 4,500 acre-feet of Cyclic Storage from San Gabriel District. Pre-order applied to calculated 2013-14 Replacement Water Obligation.
9/ Transferred from City of Sierra Madre Cyclic Storage to San Gabriel District Cyclic Storage.
10/ Includes CSA credit.
11/ Pre-purchases by Producers of 890 AF was applied in FY 21-22, but will be deducted in UD/MWD Cyclic Storage account in FY 22-23.
Note: The minimum and maximum values are bolded.

1/ Assessments and interest rates apply to production during fiscal year indicated.

2/ The Administration Assessment is uniformly applied to each acre-foot of production and is used to fund the Administration Budget shown in Appendix Q.

3/ The Special Administration Assessment is uniformly applied to each acre-foot of production and is used to fund costs associated with Main San Gabriel Basin cleanup activities.

4/ The Make-up Water Assessment is applied to each acre-foot of production that does not bear a Replacement Water Assessment. The Assessment is not applicable to production for an Overlying Right. It is used to fund the Administration costs and Make-up Water Obligation under the Long Beach Judgment.

5/ The In-lieu Assessment is applied to each acre-foot of production, except the non-consumptive use portion of an Overlying Right, and is used to fund the differential cost of Supplemental Water for producers to take delivery of Supplemental Water as requested by Watermaster.

6/ The Water Resource Development Assessment is uniformly applied to each acre-foot of production and is used to fund costs associated with the purchase and delivery of untreated imported water to supplement stormwater replenishment.

7/ The Replacement Water Assessment is applied on production in excess of a production right and is used to purchase Supplemental Water from the appropriate Responsible Agency.

8/ Upper San Gabriel Valley Municipal Water District.

9/ San Gabriel Valley Municipal Water District. Assessed Production Year.

10/ Three Valleys Municipal Water District.

INDEPENDENT AUDITORS' REPORT

Board of Directors
Main San Gabriel Basin Watermaster
Azusa, California

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Main San Gabriel Basin Watermaster (a nonprofit organization), which comprise the balance sheets as of June 30, 2026 and 2025, and the related statements of revenues, expenses, and change in net assets, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of Main San Gabriel Basin Watermaster, as of June 30, 2026 and 2025, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Main San Gabriel Basin Watermaster and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Main San Gabriel Basin Watermaster's ability to continue as a going concern within one year after the date that the financial statements are available to be issued.

CLA (CliftonLarsonAllen LLP) is an independent network member of CLA Global. See CLAglobal.com/disclaimer.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Main San Gabriel Basin Watermaster's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Main San Gabriel Basin Watermaster's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

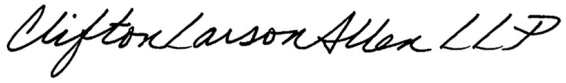

Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The schedules of revenues, expenses, and changes in net assets by fund is presented for purpose of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with GAAS. In our opinion, the information is fairly stated, in all material respects, in relation to the financial statements as a whole.

Other Information Included in the Annual Report

Management is responsible for the other information included in the annual report. The other information comprises the Management's Discussion and Analysis but does not include the financial statements and our auditors' report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

CliftonLarsonAllen LLP

Ontario, California
September 23, 2026

Background

The Main San Gabriel Basin Watermaster (Watermaster) was created by the Los Angeles Superior Court through a stipulated judgment (LASC Case 924128) to administer water rights and manage the Main San Gabriel Groundwater Basin. The Judgment prescribes Watermaster's authorities and specifies five classes of water production assessments to be used to fund certain activities. Those assessment categories are: Administrative, Replacement Water, Make-up Water, In-Lieu, and Water Resource Development Assessment. Each class of assessment has a prescribed purpose and water production base. Assessment revenue is Watermaster's principal source of income.

Watermaster's Administrative Fund includes funds for administrative expenses as budgeted each year.

The Replacement Water Fund is an assessment collected to purchase imported water to cover any production in excess of production rights, as established with the Annual Operating Safe Yield.

The Make-up Obligation Fund is money collected to purchase Make-up Water for the Lower Area (Central Basin) as part of the Long Beach Judgment. This assessment is reviewed annually and has been suspended since FY 1996-97 production due to water accounting credit. These funds are held in anticipation of a potential future obligation to the Lower Areas.

Watermaster's In-Lieu Assessment covers the cost of the Alhambra Exchange as well as the Direct Delivery Imported Water Program that was implemented in 2014-15, though not utilized in FY 2025-26. The Program was intended to shift an agency's groundwater production to a treated Metropolitan Water District connection to supply system demand in times of drought and consequently helping to keep groundwater levels from additional decline. This also includes Ready-to-Serve Charges, and the Capacity Charge within the Replacement Water Fund under the In-Lieu subheading.

During FY 2013-14, Watermaster adopted Resolution No. 09-13-257 declaring its intention to create a Water Resource Development Assessment (RDA) as a source of funding to pre-purchase water for basin storage and reliability. On May 14, 2014, the Board adopted Resolution No. 05-14-263 establishing the RDA for implementation on all FY 2014-15 production, with an accounting of each Producer's contribution.

During FY 2015-16, Watermaster developed a Stormwater Augmentation Program to help manage Basin water supplies under severe drought conditions. Through this, the Board revised Watermaster's Water Resource Development Assessment Policy to provide a funding source for water purchases for general, Basin-wide benefit, referred to as the RDA II. In early 2017, after significant rainfall and run-off in Northern California, MWD approached Watermaster with an opportunity to purchase and store excess supplies from the State Water Project. The Executive Officer and Watermaster Board negotiated a cyclic delivery to MWD's existing account in the Basin, with a 5-year payment plan, based on the RDA II assessment policy criteria. The same arrangement for an additional delivery was also approved by the Watermaster Board and MWD in early 2019. Funds from the RDA provided the mechanism to commit to this purchase of available supplemental water supplies. In addition, under similar programs offered by MWD, Watermaster entered into two additional cyclic purchase letter agreements during FYs 2024-25 and 2025-26 that carry a 10-year payment term.

Also, during FY 2024-25, Watermaster agreed to fund USGVMWD's MWD Readiness to Serve obligation in the amount of $5,158,707, from its portion of the RDA fund to stabilize imported water purchase rates from the District.

On May 7, 2025, the Watermaster Board adopted Resolution No. 05-25-339 setting FY 2024-25 assessment rates, including RDA, on all water produced during FY 2024-25. RDA II includes a ramping schedule to fund the purchase of MWD's cyclic deliveries.

Summary of Financial Information

For the year ending June 30, 2026, Watermaster's Total Assets increased by 8% to $65M, including an increase of 13% in Net Assets to $61M. The Administrative Fund had a net increase of $47,000 primarily due to an increase in water production and LAIF interest earned. The Replacement Fund had a net increase of $6.6M mainly due to the undeliverable SGV Water District RDA Order, and the $1.4M in LAIF Interest Earned. The Make-Up Obligation Fund had a net increase of $465,000. This was primarily due to LAIF interest earned of $588,300, offset by expenses of $123,500 due to the annual San Gabriel River Watermaster invoice.

Non-current assets decreased by $671,000 due to the delivery of the pre-purchased water (USG5-CWEA) from Upper District for MWD Reverse Cyclic Program. The 5-Year Agreement plan was approved on 1/8/25, to be delivered in the succeeding 5 years. Delivery began in January 2026. As the deliveries take place, Watermaster reclassifies the prepaid water into USG5 water expense.

Current liabilities include accounts payable of $3.3M in the Replacement Fund. This primarily consisted of $2M producer Cyclic Storage Order, and $1.3M for SGVMWD Replacement Obligation payment placed on hold until the City of Azusa issue was resolved, both which will be paid in the Fall of 2026.

Noncurrent liabilities decreased by $11,174 for Other Postemployment Benefits (OPEB) compared to a decrease of $4,297 in the prior year due to the update of the retirement and termination assumptions to be consistent with the 2025 CalPERS Pension Plan Experience Study. Watermaster's Actuarial Valuation is done every two years, which includes the following year's projections and helps minimize larger adjustments each year. Currently, Watermaster funds retiree health benefits on a pay-as-you-go basis by previously withholding a portion of annual employee salary Cost of Living Adjustments (COLA). In FY 2025-26, the Board approved the COLA for employees without additional deduction but maintained the existing 7%. These funds are set aside for the payment of current and future retiree health benefits. Currently, the market value of assets set aside for this purpose, as of June 30, 2026, is greater than the projected Accumulated Postretirement Benefit Obligation on June 30, 2026, by $531,458.

Review of Revenues and Expenses

The Administrative Assessment revenue increased from the prior year by $374,700 due to higher production (189,296.19 AF assessed in FY 2025-26 for water produced in 2024-25 vs.171,314.03 AF assessed in FY 2024-25 for water produced in 2023-24), with the assessment continuing at $21 per acre-foot. FY 2024-25 Administrative Assessments Revenue included about $3,000 of Prior Year Assessments for City of El Monte's production from an unreported well. The increase in Engineering Fees from the previous year was $189,000, for Water Quality Monitoring expenses was $117,000, and in Water Quality Management expenses by $37,000, which includes the unbudgeted Golden Mussel expense, and for Administrative and General expenses related to these added issues, it was $68,000 more.

Operating revenues in the Replacement Water Fund increased by $2.8M primarily due to the increase in overall production resulting in higher Replacement Obligation and RDA. In FY 2025-26, Cyclic Storage Water purchases decreased by $2.3M from the prior year. These orders included City of Arcadia, City of Glendora, and La Puente Valley County Water District. Also, in FY2025-26, overall water purchases decreased by $796,000 due to a lower RDA water purchase mainly due to SGVMWD undeliverable RDA

order, and the USG-5-CWEA Expense offset by the use of the prepurchase water bought in FY 2024-25 for USG-5-CWEA.

The In-Lieu Assessment revenue increased by $88,000, due to higher production, keeping the In-Lieu assessments at $5 per acre-foot. This assessment covers the Direct Delivery In-Lieu Water Purchases Program (though not utilized this fiscal year), the Alhambra Exchange Agreement (AEA), the Ready-to-Serve Charge (excluding the Upper Water Net RTS paid thru RDA Assessments), and the Metropolitan Water District Capacity Charge assessed for taking treated imported water during peak demand.

Comparison of FY 2025-26 Administration Budget to Actual Revenues and Expenses

Administrative Assessment revenue came in higher than the budgeted amount due to production being higher than budgeted. Other Income and Reimbursements, which include BPOU Reimbursements for Labor and Overhead, came in higher than Budget by about $69,000 due to timing of the RBMB Administrative deposit along with an increase in the BPOU Reimbursements for Labor and Overhead due to cross training with the Executive Officer, the Director of Administrative Services, and the Director of Water Resources. We also had more time spent reviewing findings from the modeling done for the upcoming renewal and approved asset management plans under the current agreement and approved budget. Interest Income was budgeted at $100,000, and actual was $120,700.

Overall, Engineering and related expenses came in lower than budget by approximately 13%. These savings include Production Reporting by $4,000, WQ Monitoring by $378,000, mainly due to UCMR and PFAS Lab Costs/Sampling. Additional savings were seen in WQ Management under Section 28 Staff reports by $3,000 and $4,000 for Groundwater Monitoring Network offset by the higher Mussel Control Plans overage of $21,000 due to the Golden Mussel. These savings were offset by Engineering Fees being higher than budgeted by $69,000. These over-expenditures include general preparation by $18,000, which include BWM Committee Meetings, RDA Ad-hoc Meetings plus a study with Three Valleys on imported opportunities. Other overages include PBWA, proposed Las Virgenes and Calleguas Storage/Export Agreements, Fed/State General by $29,000, $7,300 in other studies, which includes Eaton Fire and CIC Diversion Records, and $32,000 for S.G. Canyon Studies/Management mostly related to the mis-reporting of deliveries with Azusa and SGVMWD. The BPOU Agreement Renewal Work was overbudgeted by $81,000, which included $26,000 in costs from prior year misclassified in a receivable.

Legal expenses for the year were budgeted to include Quagga/Golden Mussel Management Plan as well as preparation for BPOU negotiations. Additionally, concerns regarding environmental and habitat designations including federal Wild and Scenic River designations that could potentially impact water rights in the Main Basin. In total, legal expenses for fiscal year 2025-26 were 52% lower than budgeted.

Under administrative costs, areas of higher than budgeted expenditure include Copier Lease/Usage, Office Supplies & Services, and Public Education. The Copier Usage on the new machine was not invoiced for a year and a half until FY 2025-26, Office Expense included $15,500 for the Classification and Comp Study implemented for the Succession Plan, but it was offset by other savings. In Public Education, the 33% overage was due to participation in the L.A. Times print and digital campaign with the Responsible Parties and WQA on Golden Mussel Information. This was not anticipated in the budget but was necessary as the mussel has halted imported water deliveries for replenishment. Depreciation expense is not a budgeted item since it only reduces the fixed assets and it's not a cash-related expense.

Budget savings in administrative costs were seen in several areas. Areas of lower than budgeted expenditure include Meeting/Travel, Printing, Computer/Office Equipment (Software/Furniture), and Salaries & Benefits. For the Meeting/Travel, Watermaster had originally budgeted for strategic planning of

$20,000, which was not used in FY 2025-26. Printing had a 45% savings due to the use of a new vendor for the 5-Year Plan and Annual Report. Part of the Computer Equipment/Furniture budget was used for the Director of Water Resources' office furniture, which is listed under Fixed Assets. Savings in Salaries & Benefits are related to staffing changes and the timing of hiring versus budgeted, internal promotion of existing staff instead of recruitment for vacant position and the not using an intern for the last three months of the year. The contingency line item of $417,000 was left unused for FY 2025-26.

The financial report contained herein is designed to provide a general overview of the finances, activities, and operations of the Watermaster. To obtain additional information, please feel free to contact the Main San Gabriel Basin Watermaster at 626-815-1300.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Activities

In a judgment dated January 4, 1973, in the Superior Court of the State of California for the County of Los Angeles, the court established the Main San Gabriel Basin Watermaster ("Watermaster", or "Organization"), which administers the judgment. One of the functions of Watermaster is to levy and collect funds to pay the city of Long Beach, the city of Compton, and the Central Basin Municipal Water District for make-up water to replace water used in the San Gabriel Basin which the lower area maintained was properly theirs. The payments have been made for several years through the Upper San Gabriel Valley Municipal Water District as a result of a negotiated agreement in 1965 and reaffirmed by a validation suit in the same year. The collections and disbursements of this fund are accounted for in the Make-Up Obligation Fund.

Watermaster also levies and collects funds to purchase replacement water for Basin overproduction. These collections and disbursements are accounted for in the Replacement Water Fund.

All financial transactions, other than those which fall within the Make-Up Obligation Fund or Replacement Water Fund, are recorded in the Administrative Fund. Assessments are made annually.

Watermaster proposed amendments to its judgment to provide greater flexibility in carrying out its purpose. The judgment amendment was approved by the court on June 21, 2012.

Basis of Accounting and Financial Statement Presentation

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Classification of Net Assets

Net assets, revenues, gains, and losses are classified based on the existence or absence of donor- or grantor-imposed restrictions. Accordingly, net assets and changes therein are classified and reported as follows:

Net Assets Without Donor Restrictions – Net assets available for use in general operations and not subject to donor (or certain grantor) restrictions.

Net Assets With Donor Restrictions – Net assets subject to donor-imposed restrictions which may be temporary in nature and met by the passage of time or other events specified by the donor. Other donor-imposed restrictions may stipulate that the resources be maintained in perpetuity.

As of June 30, 2026 and 2025, respectively, the Watermaster had no net assets with donor imposed restrictions. As such, total net assets have been reported without restrictions.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Cash and Cash Equivalents

Cash and cash equivalents consist primarily of short-term investments which have a maturity of ninety days or less. At June 30, 2026 and 2025, Watermaster invested with the State Treasurer's Local Agency Investment Fund. This is a pooled money investment account and carried at amortized cost with no restrictions on access to funds and therefore, is considered a cash equivalent.

Cash and cash equivalents at June 30, 2026 and 2025 include $962,167 and $890,913, respectively, that the board has designated for future other postretirement benefit obligations.

Accounts Receivable and Allowance for Credit Losses

All receivables represent amounts due from various vendors for services provided. Accounts receivable are reported at the amount expected to be collected. The Organization evaluates expected credit losses on an ongoing basis using historical payment trends, write off experience and aging receivables, and a review of specific accounts and adjustments are made as necessary.

The Organization periodically assesses its methodologies for estimating credit losses in consideration of actual experience, trends, and changes in the overall economic environment. Management believes no allowance for current expected credit losses is considered necessary based on historical credit losses and estimated future credit losses.

Due from BPOU Committee

Watermaster, along with six other water agencies, entered an agreement for groundwater cleanup in the Baldwin Park Operable Unit (BPOU). Under the agreement, responsible parties agreed to pay toward research, cost recovery, treatment plant construction and operating expenses in the cleanup effort. Watermaster bills the responsible parties and collects the funds. Due from BPOU committee receivable is considered fully collectible. The agreement specifies that if the parties responsible fail to make the required payments, Watermaster is entitled to be reimbursed by the Trustee.

Capital Assets

Capital assets are recorded at cost and Watermaster's capitalization threshold is $5,000. Furniture and equipment are being depreciated on the straight-line method over estimated useful lives ranging from 3 to 10 years. Depreciation expense for the years ended June 30, 2026 and 2025 was $17,012 and $12,038, respectively.

Income Taxes

On July 31, 1981, Watermaster received a ruling from the Internal Revenue Service (IRS) exempting it from federal income taxes. A similar ruling was received from the California State Franchise Tax Board (CA FTB) on October 16, 1981. As such, the Watermaster is not required to file tax returns to the IRS or the CA FTB.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Classification of Revenue and Recognition

Operating revenues are earned by levying and collecting assessments from the producers based upon their amounts of production during the preceding fiscal year. These assessments are applied primarily to the purchase of replacement water and to administrative costs. Water production assessments include Administrative, In-Lieu, Make-Up Water, Replacement, and Water Resource Development. Assessments are billed on a yearly basis. Annual assessments are recognized as revenue in the period when the annual assessments are levied, based upon preceding fiscal year production. Nonoperating revenues are those derived primarily from investment income.

Use of Estimates

In preparing financial statements in conformity with U.S. GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. Actual results could differ from those estimates.

NOTE 2 CASH DEPOSITS AND INVESTMENTS

Custodial Risk

Custodial credit risk is the risk that in the event of a bank failure, Watermaster's deposits may not be returned to it. Watermaster does not have a deposit policy for custodial credit risk. Deposits in financial institutions, reported as components of cash, were fully insured by depository insurance or secured by collateral held by the pledging financial institutions and trust department in Watermaster's name.

Investment Interest Rate Risk

Watermaster has an investment policy that limits investment maturities to no more than five years as a means of managing its exposure to fair value losses arising from increasing interest rates.

NOTE 2 CASH DEPOSITS AND INVESTMENTS (CONTINUED)

Investment Credit Risk

Watermaster's formal investment policy limits its investment choices to the following:

1. Local Agency Investment Fund (LAIF)
2. U.S. Treasury and agency obligations
3. Fully insured certificates of deposit
4. Investment in local water quality and supply projects, associated with Basin cleanup objectives, through the borrowing of funds from the Make-Up Water Fund.

Concentration of Investment Credit Risk

Watermaster's formal investment policy limits any one type of investment to no more than 25% of the total portfolio, except for LAIF or U.S. Treasury and agency obligations.

NOTE 3 EQUIPMENT AND LEASEHOLD IMPROVEMENTS

Equipment and leasehold improvements consisted of the following at June 30:

	2026	2025
Furniture and Equipment	$ 284,208	$ 267,421
Leasehold Improvements	34,355	34,355
Total	318,563	301,776
Less Accumulated Depreciation	(237,861)	(220,849)
Equipment and Leasehold Improvements, Net	$ 80,702	$ 80,927

NOTE 4 LEASES

Watermaster leases office space from the city of Azusa under a year-to-year lease agreement which may be canceled by the Watermaster or the City of Azusa at any time with a 30-day notice. In addition to the monthly rental amount, Watermaster is required to pay a percentage of management and operating expenses. Watermaster also leases certain equipment under noncancelable leases. The Organization has elected to recognize payments for short-term leases with a lease term of 12 months or less as expense as incurred and these leases are not included as lease liabilities or right of use assets on the balance sheet.

NOTE 5 PENSION PLAN

Plan Description and Provisions

Qualified employees are eligible to participate in the Public Agency Cost-Sharing Multiple-Employer Plan under the California Public Employees' Retirement System plan (CalPERS), a cost-sharing multiple-employer defined benefit pension plan administered by CalPERS. The Public Agency Cost-Sharing Multiple-Employer Plan is comprised of a Miscellaneous Pool and a Safety Pool. Watermaster sponsors two Miscellaneous Risk Pool plans, however, the information presented below represents the sum of the allocated pension amounts for each of Watermaster's plans (the Plan). The Plan provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to Plan members and their beneficiaries. Benefit provisions are established by state statutes, as legislatively amended, within the Public Employees' Retirement Law. Copies of CalPERS' annual financial report may be obtained from their executive office: 400 P Street, Sacramento, CA 95814.

Funding Policy and Annual Pension Cost

The Public Employees' Pension Reform Act of 2013 (PEPRA) introduced a new class of Members (PEPRA Members) and defined different assumptions and benefits for these PEPRA Members than those used for continuing members (Classic Members). Classic Members are required to contribute 7% of their annual covered salary and PEPRA Members are required to contribute 7.75% of their annual covered salary. Watermaster makes the contributions required of the Classic Members on their behalf and for their account but does not make the contributions required of the PEPRA Members. Watermaster is required to contribute annually at actuarially determined rates; the current rates are 12.58% and 7.96% of annual covered payroll for Classic Members and PEPRA Members, respectively.

The contribution requirements of plan members and Watermaster are established and may be amended by CalPERS. For fiscal year ended June 30, 2026, Watermaster's annual pension cost of $368,783 for CalPERS was equal to Watermaster's required and actual contributions.

Funded Status

The following information summarizes the funded status of the CalPERS Plan as of June 30, 2025 measurement date, the most recent actuarial valuation date available:

	Plan-Wide Information (In Thousands)
Total Pension Liability	$ 58,228,707
Less: Plan Fiduciary Net Position	47,998,976
Plan Net Pension Liability	$ 10,229,731
Funded Ratio	82.43%

NOTE 6 POSTRETIREMENT HEALTH BENEFIT PLAN

Watermaster provides medical coverage to seven active employees and two retired employees through the Association of California Water Agencies/Joint Powers Insurance Authority (ACWA/JPIA) Health Program. At retirement, Watermaster provides a contribution for the continuation of medical coverage for eligible retirees. For employees hired prior to January 1, 2013, eligibility for a Watermaster contribution requires retirement from Watermaster under PERS on or after age 55 with at least 10 years of full-time service. For employees hired after January 1, 2013, and new to PERS, eligibility for a Watermaster contribution requires retirement from Watermaster under PERS on or after age 62 with at least 10 years of full-time service. Watermaster provides for a contribution equal to a 100% of the cost of medical coverage for the retiree if electing retiree only coverage and 50% of the cost of medical coverage if electing coverage for the retiree and eligible dependents. Benefits are payable until the retiree's attained age of 65.

Watermaster currently finances benefits on a pay as you go basis. Although the plan has no segregated assets, Watermaster does maintain funds in LAIF that are designated for retiree health care costs. At June 30, 2026, the fund's designated balance was $962,167.

The following tables set forth further information about Watermaster's postretirement benefit plan:

	2026	2025
Plan Obligations and Funded Status:		
Projected Benefit Obligation at June 30	$ 430,709	$ 441,883
Plan Assets at Fair Value at June 30	-	-
Unfunded Status at End of Year	$ 430,709	$ 441,883
Employer Contributions	$ 36,127	$ 28,298
Plan Participants' Contributions	-	-
Benefits Paid	36,127	28,298

Amount recognized in the balance sheets at June 30 consists of:

	2026	2025
Other Postretirement Benefit Obligation	$ 430,709	$ 441,883

Amount recognized in the statements of revenues, expenses, and changes in net assets at June 30 consists of:

	2026	2025
Service Cost	$ 9,413	$ 8,942
Interest Cost	14,940	15,059
Net Periodic Benefit Cost	24,353	24,001
Total Amount Recognized in the Statement of Revenues, Expenses, and Changes in Net Assets	$ 24,353	$ 24,001

NOTE 6 POSTRETIREMENT HEALTH BENEFIT PLAN (CONTINUED)

Other changes in plan assets and benefit obligations previously recognized in changes in net assets without restriction:

	2026	2025
Actuarial Loss	$ (81,271)	$ (81,271)
Amounts Previously Recognized in Unrestricted Net Assets, not yet Recognized as Periodic Benefit Cost at June 30	$ (81,271)	$ (81,271)

Weighted-average assumption used to determine benefit obligations as of June 30:

	2026	2025
Discount Rate	5.27%	5.27%
Expected Long-Term Return on Plan Assets	N/A	N/A
Rate of Compensation	N/A	N/A
Health Care Cost Trend Rate Assumed for Next Year	7.75%/6.25%	8.00%/6.50%
Rate to Which the Cost Trend Rate is Assumed to Decline (the Ultimate Rate)	4.50%	4.50%
Year that the Rate Reaches the Ultimate Trend Rate	13/7 Years	14/8 Years

Watermaster expects to contribute $18,620 to the plan during the next fiscal year ended June 30, 2027. The following is a projection of expected future benefit payments under the plan:

Year Ending June 30,	Amount
2027	$ 18,620
2028	21,308
2029	27,577
2030	39,135
2031	39,392
Thereafter	142,875
Total	$ 288,907

NOTE 7 WATER RESOURCE DEVELOPMENT ASSESSMENT

Pursuant to the June 21, 2012 judgment, Watermaster has adopted Resolution No. 05-14-263 which established a Water Resource Development Assessment (RDA I) on all water produced from the Basin. This assessment is intended to aid Watermaster in the purchase and storage of 100,000 acre-feet of supplemental water to address potential future replacement water obligations in the event supplemental water supplies are interrupted in the future. The RDA will be evaluated annually and assessed over a 10-year period ending with the 2023-24 fiscal year production. Water stored under this program can be used only by action from the board under one or more of the following conditions: Watermaster's inability to deliver at least 50% of basin replacement Water for two consecutive years; damage to State Water Project or Colorado River aqueduct facilities; the implementation of a drought allocation penalty rate for the purchase of replacement water. Water stored under this program will not have any influence on the determination of the annual operating safe yield. With implementation of RDA II, RDA I was paused, but reviewed annually.

During FY 2015-16, Watermaster developed a Stormwater Augmentation Program to help manage Basin water supplies under severe drought conditions. Through this, the board revised Watermaster's Water Resource Development Assessment Policy to provide a funding source for water purchases for general, Basin-wide benefit, referred to as the RDA II. RDA II established a 5-year ramping assessment, from $40/AF to $175/AF on all water produced in the Basin. Like RDA I, the Watermaster board will review annually to determine need. In early 2017, after significant rainfall and run-off in Northern California, MWD approached Watermaster with an opportunity to purchase excess supplies from the State Water Project. The Executive Officer and Watermaster board negotiated a cyclic delivery to MWD's existing account in the Basin, with a five-year payment plan, based on the RDA II assessment policy criteria.

The RDA I and RDA II are part of a single program. The RDA II program was an expansion of the RDA implemented for general benefit water while considering financial tolerances of rate payors. As of June 30, 2018, all funds collected through the RDA program to purchase water fall under the RDA II facet.

NOTE 8 DIRECT DELIVERY IMPORTED WATER PROGRAM

As a result of declining basin water levels and the prolonged drought, Watermaster established a Direct-Delivery Imported Water Program effective January 1, 2015. Through this program participating agencies will shift their demand from groundwater production to direct delivery of treated imported water. Watermaster is obligated to reimburse participating agencies for these purchases up to amounts designated by board approval.

Watermaster began levy and collection of assessments to offset this production in fiscal year 2015-16 included in the annual In-Lieu assessment.

NOTE 9 SUBSEQUENT EVENTS

Management evaluated subsequent events through September 23, 2026, the date the financial statements were available to be issued.
